**CUMULUS LICENSING LLC**  
**NEW FM TRANSLATOR STATION**  
**CH 297D - 107.3 MHZ - 0.025 KW**  
**BRIDGEPORT, CONNECTICUT**  
**April 2018**

**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC (“Cumulus”), an applicant for a new FM translator station on Channel 297D at Bridgeport, Connecticut (FAC ID 202762). Cumulus is herein submitting the long form construction permit application for the “Tech Box” application (BNPFT-20180130ACO) for this facility, pursuant to Public Notice DA 18-256, released March 15, 2018.

The proposed new FM translator antenna is to be located on an existing structure which has been registered with the FCC and assigned Antenna Structure Registration Number 1203184. Since no changes are proposed for the tower structure, the FAA was not notified of this proposal.

Cumulus proposes to rebroadcast the signal of AM station WICC, 600 kHz, Bridgeport, Connecticut on the proposed new facility. The proposed new translator's 60 dBu contour is within 25.0 miles (40.0 kilometers) of the WICC site; therefore, the new translator is considered a fill-in translator. Exhibit A is a map demonstrating compliance with the fill-in requirements.

Exhibit B is a study demonstrating that the proposed new translator will not cause interference to any full service station, nor will interference be delivered to or received from any existing FM translator or LPFM application.

All other necessary documentation used to certify the technical portion of FCC Form 349 has been forwarded to Cumulus and is available to the Commission upon request.<sup>1</sup>

---

1) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All data regarding broadcast facilities was extracted from the Commission's CDBS database on the date of this application. We assume no liability for errors or omissions in that database which may be adverse to the request contained herein.
