(TMMO)  
WADB(AM), Asbury Park, NJ  
Facility Identification Number: 14895  
Special Temporary Authorization (STA)  
BESTA-20180306AAN

Dear Mr. Kitchen:

This is in reference to the request filed on March 6, 2018. TMMO requests a further extension of the STA granted on November 12, 2013, and last modified to continue operating with an ND antenna to allow time to file the required FCC Form 302 application due to repairs made over the past 4 years.<sup>1</sup> In support of the request, TMMO states that additional time will be needed to complete all repairs and file the application to update all operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and TMMO may continue to operate ND using tower #1 (ARSN 1224828) with a maximum of 0.625 kW day

<sup>1</sup> WADB(AM) is licensed for DA operation on 1310 kHz with 2.5 kW day and 1 kW night using different patterns.

and 0.25 kW night. TMMO must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. TMMO must submit the 302 application if any changes are needed, or submit an e-mail to my attention to certify the date the station resumed licensed operations with negligible changes to the last license.

This authority expires on **September 29, 2018**.

Sincerely,
