Re: KXNT(AM), North Las Vegas, Nevada
Facility Identification Number: 33068
CBS Radio Stations Inc.
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed September 25, 2006, on behalf of CBS Radio Stations Inc. ("CBS"; formerly, Infinity Radio Operations, Inc.). CBS requests further extension of the special temporary authority ("STA") granted November 22, 2002, to operate Station KXNT with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits.¹

In support of the request, CBS states that electricity distribution towers in proximity to the KXNT array continue to distort the licensed directional pattern. CBS states that its consulting engineers have determined that it will not be possible will be necessary to compensate for the impact of the nearby structures, that the station must be relocated and that its lease at the licensed site will not be renewed. CBS states that it is conducting studies in preparation for the filing of an application to relocate the station.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due

¹ KXNT is licensed for operation on 840 kHz with 50 kilowatts daytime and 25 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

to causes beyond its control. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KXNT may continue to operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. CBS must notify the Commission when licensed operation is restored.² CBS must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 7, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a large initial "C" and "M".

Charles N. Miller, Engineer
