**EXHIBIT A**

This proposal seeks to change the community of license of the vacant allotment on Channel 225C3 from Clatskanie, Oregon to Fords Prairie, Washington. As noted on Exhibit A1, Channel 225C3 at Fords Prairie, Washington is mutually exclusive with the original Channel 225C3 allocation at Clatskanie, Washington. From the proposed site, Channel 225C3 meets the Commission's minimum distance separation requirements to all licensed, applied for or proposed facilities. Channel 225C3 from the proposed allocation/implementation site will provide a predicted 70 dBu signal over 100% of the community of Fords Prairie, Washington, as denoted on Exhibit A2. It is noted that actual terrain conditions were considered in depicting the city coverage. Use of actual terrain from a proposed application site is allowable under the Woodstock and Broadway, Virginia rule.<sup>3</sup> Further, the proposed new FM site is located at an authorized tower, therefore, the site is suitable for tower construction.

Based on the foregoing, this instant proposal meets the allocation criteria. Therefore, this proposal is in compliance with the Commission's rules.

---

3) Woodstock and Broadway, Virginia, Memorandum Opinion and Order, 3 FCC Rcd 6398, 6399 (1988).
