

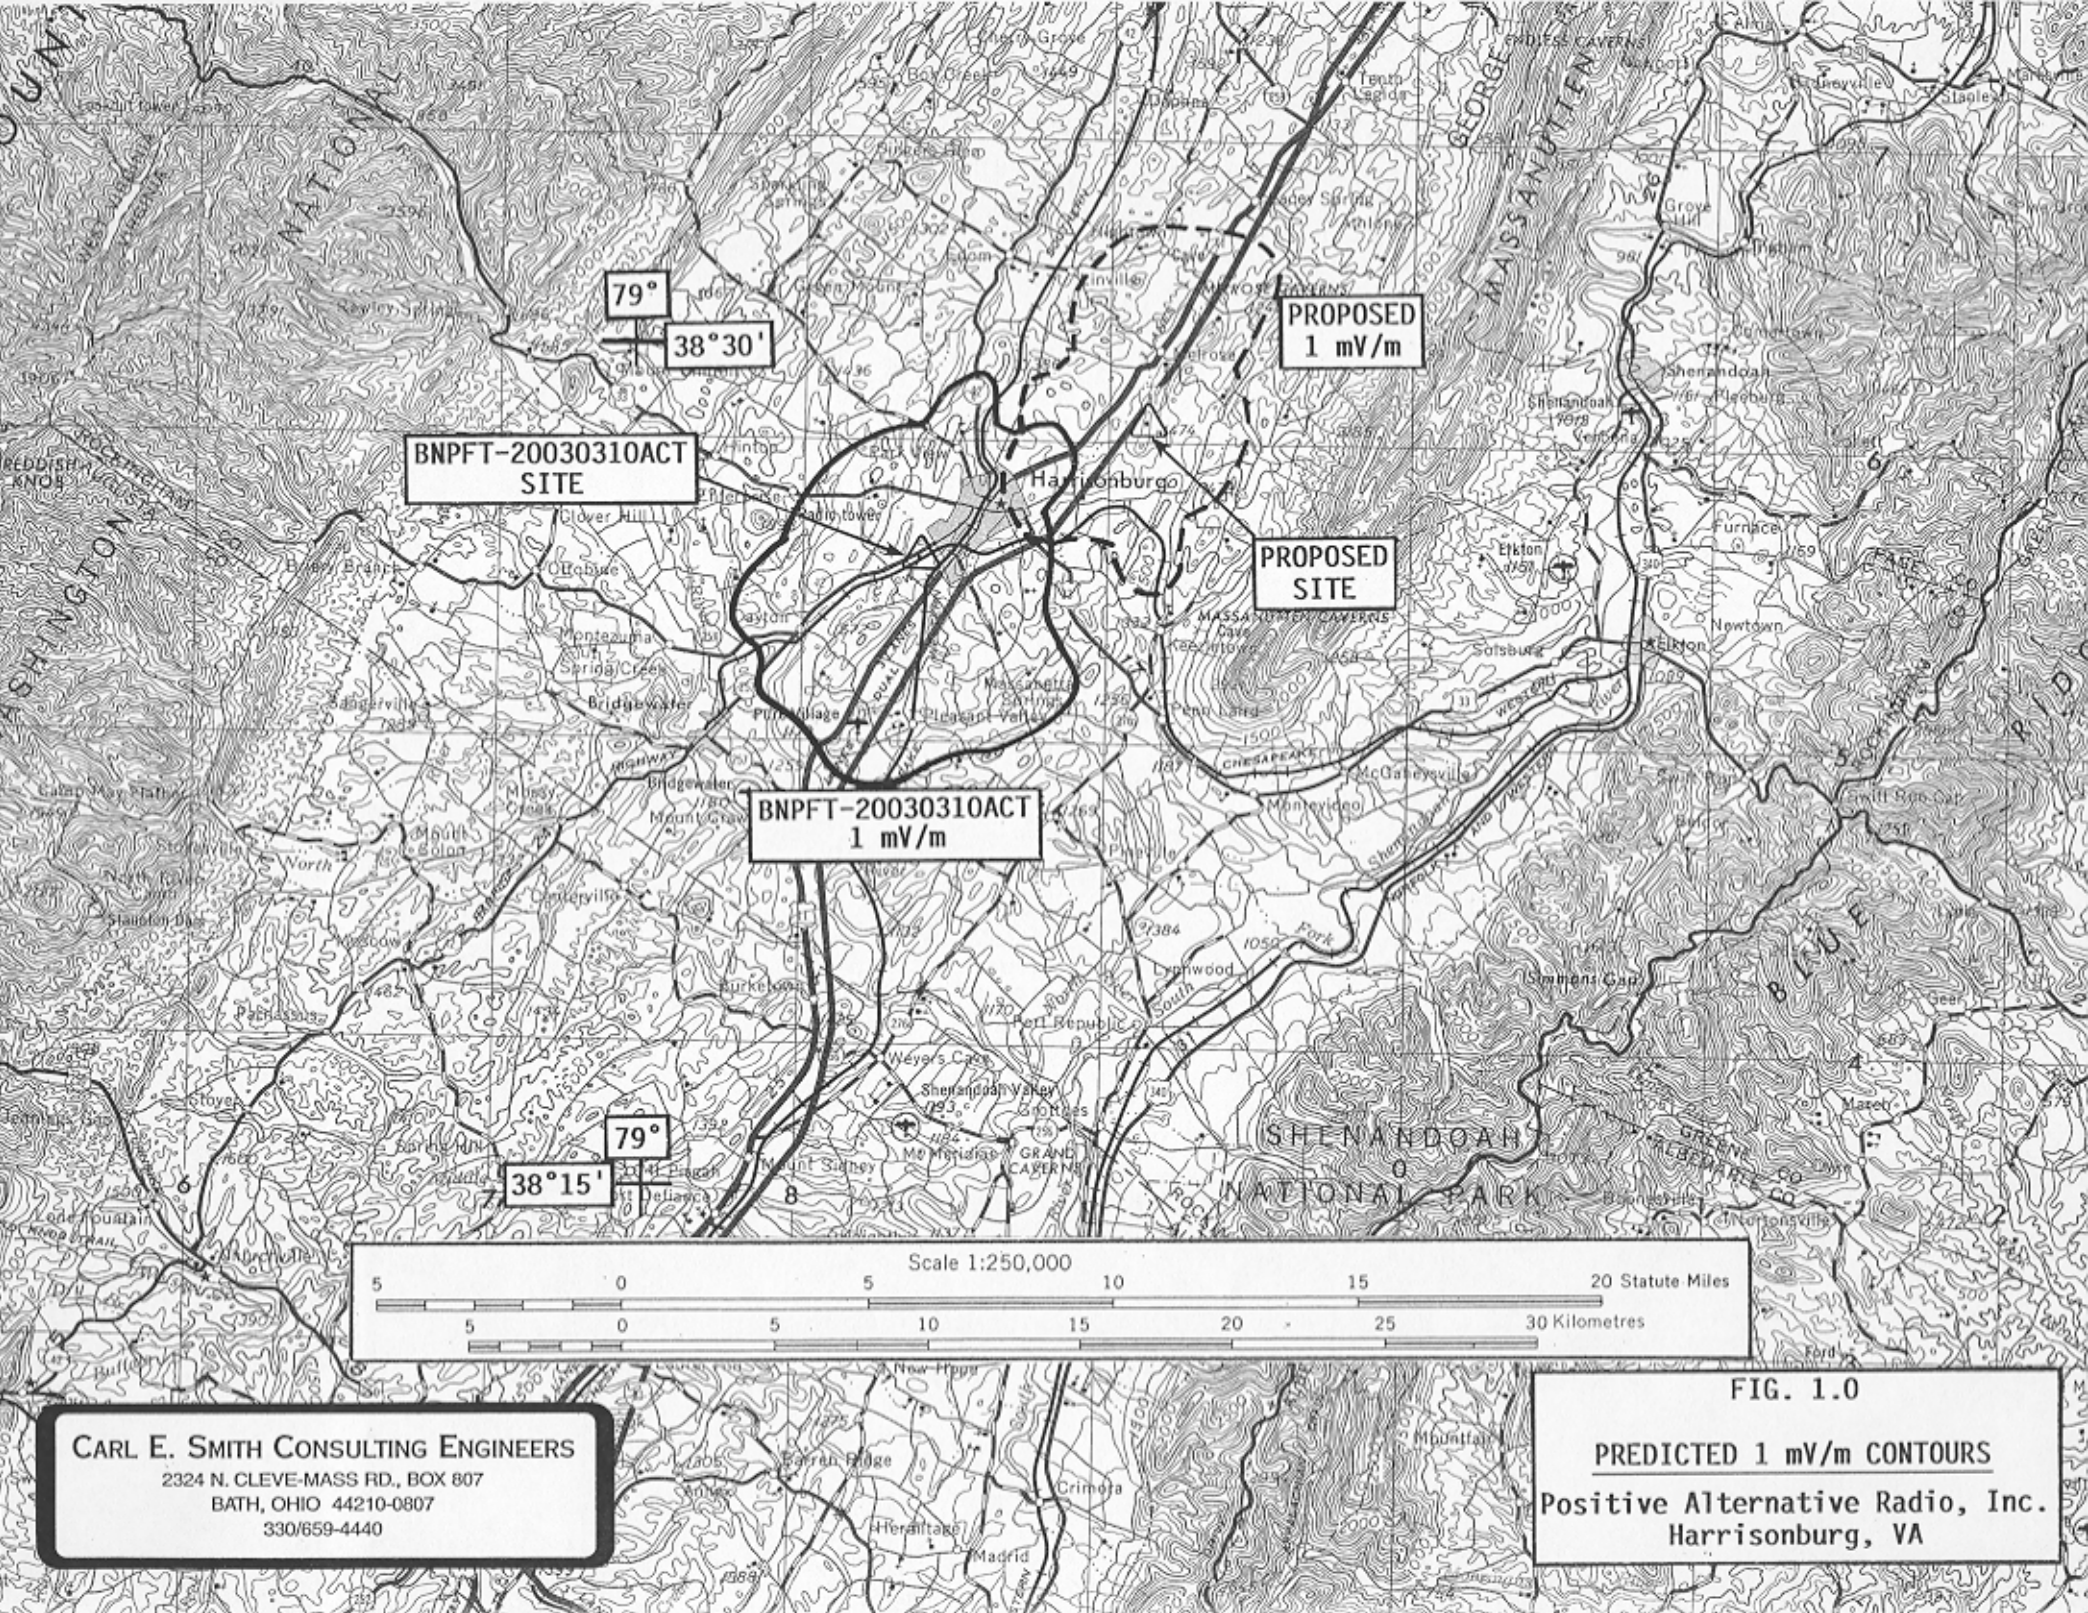

EXHIBIT 1  
(Page 1 of 2)

VARIATIONS FROM FACILITIES PROPOSED IN  
ASSOCIATED "SHORT FORM" APPLICATION

Positive Alternative Radio, Inc.  
Harrisonburg, VA

The transmitter site specified for the proposed translator in attached "long form" differs from the transmitter site specified in the associated "short form" application (BNPFT-20030310ACT). Figure 1.0 is a map exhibit depicting the predicted 1 mV/m contour for the facilities proposed in the associated "short form" application in relation to the 1 mV/m contour predicted for the facilities proposed in the attached "long form" application. As can be seen from an examination of this figure, there will be significant overlap between these contours. Based upon this information, this modification to the proposed technical facilities is considered to be a minor change, pursuant to Section 74.1233(a) of the FCC Rules and this modification is permitted in the context of the attached "long form" application by Section 74.1233(d)(5)(iii) of the FCC Rules.
