

**ENGINEERING STATEMENT OF JAMES D. SADLER  
IN SUPPORT OF A REQUEST FOR  
SPECIAL TEMPORARY AUTHORITY  
STATION WWRC – WASHINGTON, DC  
1260 kHz – 25 kW-D, 5 kW-N, U, DA-2  
Facility ID: 8681**

**Licensee: Salem Media of Virginia, Inc.**

I am a Technical Consultant, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission.

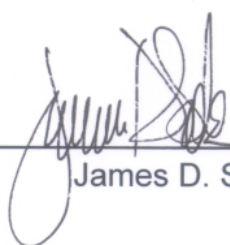

This office has been authorized by Salem Media of Virginia, Inc. (herein "Salem"), licensee of AM Broadcast Station WWRC, Washington, DC, to prepare this engineering statement in support of a request for Special Temporary Authority (STA). Station WWRC is licensed for operation on 1260 kilohertz with power of 25 kilowatts during daytime hours and 5 kilowatts during nighttime hours employing different directional antenna patterns during day and night (DA-2). Salem holds a construction permit, File No. BP-20120824AAY, to modify the daytime directional antenna pattern and increase the daytime power to 35 kilowatts. Special Temporary Authority (STA) is requested for non-direction operation during daytime and nighttime hours as required during the modification of the daytime phasing and coupling system. Operation will be with 25 percent of its licensed daytime (6,250 Watts) and nighttime (1,250 Watts) power levels.

ENGINEERING STATEMENT OF JAMES D. SADLER  
PAGE 2 OF 2

Following the physical modifications and during the preparation of a full proof-of-performance, WWRC will operate with the substantially adjusted authorized daytime directional antenna pattern at its licensed daytime power of 25 kilowatts except during testing at which operation will be at the authorized power of 35 kilowatts.

This statement was prepared by the undersigned and the information contained herein is believed to be true and correct.

DATED: March 21, 2013

  
James D. Sadler
