Re: Antenna Certification
Survey #35611-24209

Dear Ed,

This letter certifies that we have measured the azimuth orientation of the antennas at the azimuths of 70° and 218° as shown on the construction plans prepared by Shively for the installation on the tower on Fairchild Road in the SW ¼ of Section 35 of T6S, R11W, Lockport Township, St. Joseph County, Michigan and were found to be within one degree of the azimuths provided.

Please feel free to contact me if you have any questions.

Sincerely,

David W. Mostrom
