July 29, 2009

In evaluating the proposed conversion to digital for K03HK, FID 130220, an outgoing interference study was executed. It was discovered that according to Longly-Rice methods approved by the OET, that KVHF-LP would receive lethal interference if K03HK was to commence digital operation on channel 3. After thorough searching, channel 25(T) was found to cause no lethal levels of interference to stations. Thus, Three Angels Broadcasting Network respectfully requests that the Commission look favorably on this application.
