

February 2011
KCWR(FM) Channel 296A
Bakersfield, California
Community of License Coverage

It is noted that the 70 dBu contour of the corrected KCWR facility does not encompass at least 80% of the area of the City of Bakersfield, nor does the 60 dBu contour encompass 100% of the city. However, KCWR has operated from this transmitter site continuously since the station was first licensed in 1990 (see the current license BLH-19900330KB, which covered the original construction permit BPH-19831202AG). Furthermore, the 70 dBu contour encompasses 99% of the population of the city (244,619 of the 247,057 person population per the 2000 Census), which satisfies the Commission's "substantial compliance" standard for coverage of the community of license. Since the only modification proposed by this application is a 140-meter correction in the transmitter site coordinates (with a corresponding recalculation of the antenna HAAT), KCWR is believe to comply with the community of license coverage requirements set forth in §73.315 of the Commission's Rules.

The 70 dBu contour encompasses 99% of the population of the City of Bakersfield.
