KFKF-FM FCC 302-FM Application  
Permissive Change  
Environmental  
Infinity Radio Holdings Inc.  
September 7, 2004

An Environmental Assessment is not required, as grant of this application would not be considered a major environmental action.

The proposed replacement transmitting antenna will be side mounted on a tower that has been registered with the Commission. No change is proposed in the overall height of the tower above sea level.

The proposed transmitting facilities will continue to comply with the FCC guidelines limiting human exposure to radio frequency energy. The maximum power density level at ground level, calculated in accordance with OET Bulletin No. 65 (August 1997), would be considerably less than 5% of the applicable limit for exposures of unlimited duration. Accordingly, the proposed facility is categorically excluded by FCC Rules from having to consider the contributions of other stations at the site. If work is done on the tower in an area where over exposure could occur, the Licensee in coordination with the other users will take necessary action to prevent the overexposure of workers on the tower including reducing the transmitting power or ceasing operation completely.

A fence is already in place surrounding the tower in compliance with the AM antenna rules. In addition, the entire site is fenced with a locked gate.
