

## **Exhibit 1: Structure Registration Considerations:**

Pursuant to CFR 47 Section 17.4(a), any antenna structure that requires notice of proposed construction to the Federal Aviation Administration (FAA) must register the structure with the Commission. This exhibit is intended to show this structure does not require FAA notification and therefore FCC registration is also not required.

Pursuant to CFR 47 Section 17.14(b), FAA notification is not required for any antenna structure of 6.1 meters in height or less. This antenna structure will be placed on top of an existing apartment building. The building itself is not considered part of the antenna structure. The proposed antenna structure meets this exception in that it is 6.0 meters high. Below is the **TOWAIR Determination Results** of this proposal:

### **DETERMINATION Results**

**Structure does not require registration. The structure meets the 6.10-meter (20-foot) Rule criteria.**

### **Your Specifications**

#### **NAD83 Coordinates**

Latitude	44-54-23.0 north
Longitude	097-06-21.0 west

#### **Measurements (Meters)**

Overall Structure Height (AGL)	24
Support Structure Height (AGL)	18
Site Elevation (AMSL)	539

#### **Structure Type**

BPOLE - Building with Pole
