## **MULTIPLE OWNERSHIP SERVICE CONTOUR ANALYSIS**

**Prepared for  
Combined Communications, Inc.  
October 2004**

The attached analysis of compliance with the radio multiple ownership rules was prepared in accordance with the Rules and Regulations of the Federal Communications Commission.

### **Unrated Market**

All of Combined Communications' stations are located within the Bend, Oregon, market:

KBND(AM)	1110 kHz	Bend
KTWS(FM)	252C3	Bend
KMTK(FM)	259C3/C2	Bend
KLRR(FM)	269C2	Redmond

The Bend market is not rated by Arbitron. Therefore, analysis has been made consistent with the Commission's interim rules for unrated markets. The 70 dBu contours of FM stations were determined from the technical data contained in the most recent edition of the FCC FM Database. The listed antenna height above average terrain was used together with topographic data obtained from the digitized 30 second or 3 second database. The 5 mV/m daytime contours of AM stations were determined from the technical data contained in the most recent edition of the FCC AM Database. The listed antenna parameter information was used together with a digitized version of the FCC M-3 or Region II ground conductivity database.

The service contours were plotted using correct map projection mathematics. Those stations whose transmitter sites are within the respective principal community service contours of the

stations proposed to be commonly owned have only the sites rather than their contours shown. All contours and enclosed transmitter site locations have been labeled. A list of all stations considered is included with this statement.

In counting stations providing service to the "market" defined by each of the discrete clusters formed in unrated markets, stations whose transmitter sites are located in excess of 92 km from the perimeter of the common overlap area have been excluded, as have other stations to be commonly-owned but which do not have overlap with the discrete cluster being studied. This exhibit evidences at least the minimum number of stations necessary to demonstrate compliance with the rules concerning radio multiple ownership in unrated markets.

It should be noted that the instant analysis applies equally to the licensed facilities of the Combined Communications stations, as well as to the pending application facilities for the three FM stations.

October 22, 2004

A handwritten signature in black ink, appearing to read "Erik C. Swanson". The signature is fluid and cursive, with a large initial "E" and "S".

Erik C. Swanson
