

MODIFY BMLH-20121120AHA
ARTISTIC MEDIA PARTNERS, INC.
WBWB FM RADIO STATION
CH 244A - 96.7 MHZ - 1.65 KW
BLOOMINGTON, INDIANA
June 2015

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Artistic Media Partners, Inc. ("Artistic Media"), licensee of radio station WBWB, Channel 244A, Bloomington, Indiana. During a recent internal station review, it was determined that the antenna used by WBWB was misidentified as a half wavelength antenna in the most recent FCC Form 302-FM application (BMLH-20121120AHA) to modify the WBWB license. Artistic herein proposes to modify the license of WBWB (BLH-19860515KB) to correct the antenna used by WBWB which impacts the station's transmitter output power.

No other changes to the station operation are proposed. Exhibit A is a calculation of the station transmitter power using the correct antenna. There are no actual changes to the WBWB antenna. As no permit was granted prior to the submission of this modification application, there are no conditions/restriction to address. However, Artistic Media will reduce the power of the WBWB antenna, or cease operation, in coordination with other uses of the tower, to protect persons having access to the site from radio frequency electromagnetic fields in excess of the FCC's guideline. Based on the foregoing, it is believed that the WBWB modification is in compliance with the Commission's rules.
