26 September 2017,

Mr. Langley,

On 8 September 2017 I was on-site at the tower on Robinson Road. Per your request I established and place azimuth markers on the ground at Azimuth's 66° , 80° , and 295° to aid in the proper alignment of the 3 antennas.

If you have any further questions please feel free to contact me at your convenience.

Thank you,

Neil A. Holshoe, PS
