

# Installation Affidavit

To Whom It May Concern:

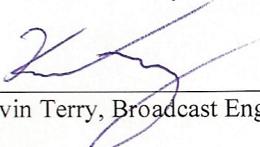

I, Kevin Terry, installed the Directional FM Antenna for KIMO(FM) Helena Valley SE, MT, pursuant to BMPH-201108901AQX. Installation and certification was completed on October 5, 2011. The following parameters were followed in the installation of the Shively 6600 6 Bay half-wave spaced horizontally polarized sidemount antenna:

- In compliance with the FCC Construction Permit, the antenna was installed so that the array's Center of Radiation is located at a height of 19 meters above ground level. This equates to 2376 meters above mean sea level.
- Pursuant to the antenna manufacturer's mounting instructions, the antenna was mounted on the southwest leg (211 degree leg) of the tower and with the feedline connecting the antenna input flange to the radiating element of each antenna bay pointed straight off the tower leg at 211 degrees true.

I certify that the KIMO(FM) antenna was installed pursuant to the manufacturer's instructions and understand that this statement shall be included in an FCC filing. My qualifications are a matter of record at the Commission and include the following:

- I have installed FM antenna systems on towers for 12 years. In so doing, I have managed tower crews, climbed towers, assembled antennas, tuned antennas, and certified directional antenna installations on scores of radio stations. Antenna systems installed include brands such as Shively, ERI, Scala, Nicom, Bext, Jampro, SWR, and RFS. I have installed several directional and non-directional antenna systems including multi-station master panel, diplexed sidemount, single station sidemount, and numerous low power, translator, and booster FM antenna systems.

Certified this 7<sup>th</sup> day of October, 2011.

  
Kevin Terry, Broadcast Engineer

## NOTARY ACKNOWLEDGEMENT:

STATE OF MONTANA  
COUNTY OF ~~LEWIS AND CLARK~~

*Cascade*

The foregoing instrument was acknowledged before me this 7 day of October 2011, by Kevin D. Terry. He is personally known to me or has produced a driver's license as identification.
