

Analysis Using the Interim Contour–Overlap Methodology

Clear Channel holds the licenses of WKSJ(AM), WKSJ(FM), WMXC(FM), WNTM(AM), WRKH(FM), WTKE(FM)¹, and WTKX(FM). All of these stations overlap the principal community contour of WYCL(FM), creating 3 local “radio markets” as defined in the Commission’s contour-overlap methodology.

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form 3 "radio markets", as shown in *Figure 1*, for analysis under the Commission's rules.

As shown in Table 1 there are sufficient numbers of stations in the 3 local “radio markets” under the Commission’s counting methodology. Figures 2 – 4 depict the individual “markets”.

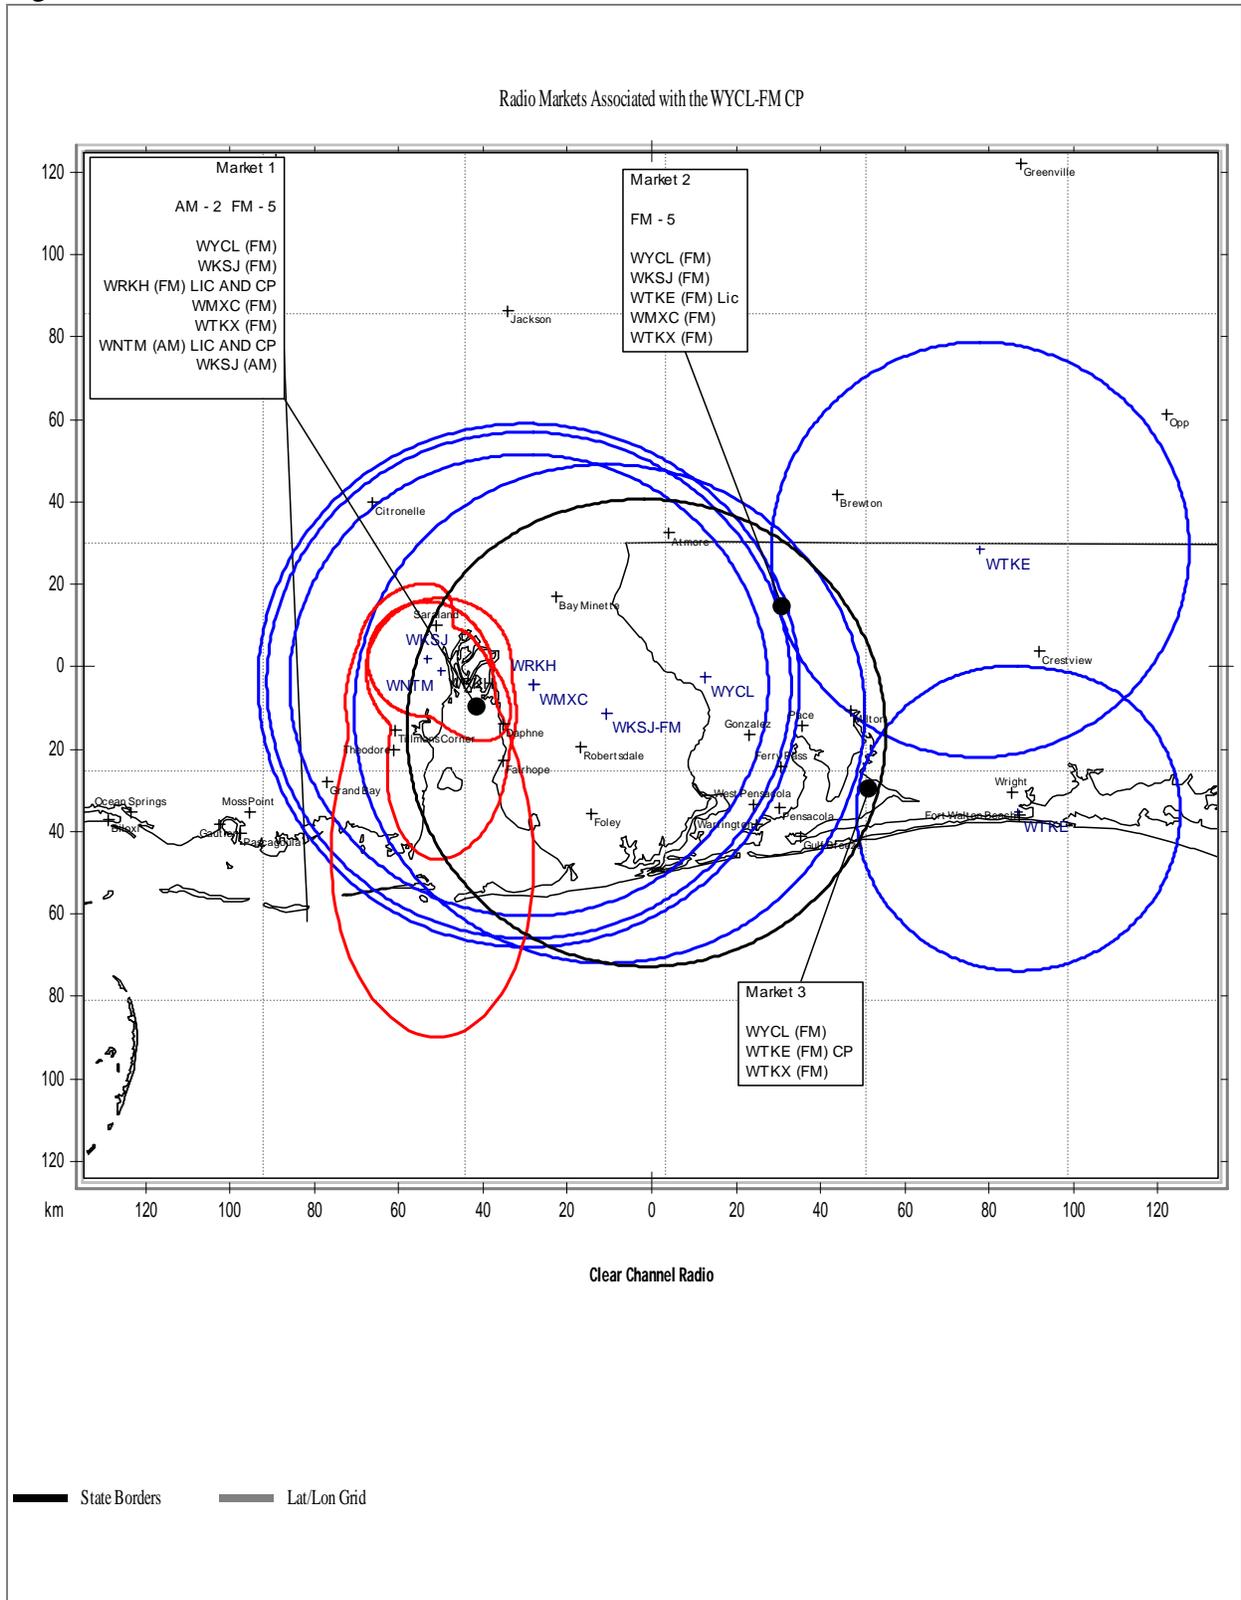

Only known licensed, operating commercial stations with contour overlap were included in the tabulations. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 5 degrees of azimuth.

¹ Clear Channel (by way of it’s subsidiary, Capstar TX Limited Partnership) has filed an application to transfer the control of WTKE (FM) to Star Broadcasting, Inc. This application was accepted for filing on 9/26/2003. See BALH-20030922AFA.
