

**WLUP-FM, Chicago, Illinois
FCC Form 302-FM
Section II, Question 4(b)
July 2003**

Exhibit 4

The Licensee has pending applications for the assignment of fifteen (15) radio station licenses/construction permit in the Salt Lake City-Ogden-Provo, Utah market, the St. George-Cedar City, Utah market and the Idaho Falls-Pocatello-Blackfoot, Idaho market.¹ The Commission received on December 5, 2002 and again on January 13, 2003 an informal objection to these applications. This submission was not served on any of the applicants or their counsel. The submission contains unsubstantiated and conclusory allegations regarding the proposed assignment of licenses and was fully responded to in a letter filed with the Commission on January 17, 2003. Licensee does not believe this submission raises character issues pursuant to the Commission's character qualification policies. Out of an abundance of caution, however, these pending applications are being reported here. The informal objection raises no impediment to grant of the instant license application.
