

EXHIBIT 10 / 11

FAIR DISTRIBUTION OF SERVICE

Population counts are based on the centroid method, using the 2000 Census Block Data from the U.S. Bureau of Census. Contours are based on the standard methods from 47 CFR §73.313(c), using FCC 30 second terrain data. As shown below, the applicant qualifies for processing under Section 307b.

These calculations are based on the NCE authorizations contained in the October 18, 2008 CDBS database. This results in slightly less 2nd NCE service when compared with calculations based on the October 2007 database.

Total Population - 60dbu Service	229,092
First NCE Service	23,821
First NCE Service %	10.40%
First NCE Service is above 10% and 2000 persons (answer here and Section III-1)	YES
Second NCE Service - alone	14,821
First + Second NCE Service	38,642
First + Second NCE Service %	16.87%
First + Second NCE Service is above 10% and 2000 Persons (answer here and Section III-2)	YES
