

NEW STATION APPLICATION
RADIO TRAINING NETWORK, INC.
CH 205C2 – 88.9 MHZ - 45.0 KW (DA)
CLAXTON GEORGIA
OCTOBER 2007

EXHIBIT B

Channel 6 Television Interference Compliance

The proposed facility is located within the distance specified in §73.525(a)(1) of the rules (225M) with regard to WJBF, Channel 6, Augusta, Georgia. WJBF operates with an effective radiated power of 100.0 kilowatts with a height above average terrain of 472.6 meters. The WJBF site is located at North Latitude 33° 24' 20" and West Longitude 81° 50' 01". The proposed site is outside the 47.0 dBu Grade B contour of WJBF.

WJBF will terminate operation on Channel 6 when analog television broadcasts end in February, 2009. A grant of this construction permit will be valid for 36 months, at least 18 months past the planned termination of analog television.

Radio Training Network, Inc has an agreement with WJBF to not begin operating this facility at this proposed new site until after WJBF (TV) has discontinued analog broadcast operations on Channel 6 and received confirmation from WJBF of channel 6 Discontinuance. See attached exhibit B-2.

The proposed facility is located within the distance specified in §73.525(a)(1) of the rules (225M) with regard to WCES application for DTV Channel 6, Wren, Georgia. WCES has an application for an effective radiated power of 30.0 kilowatts with a height above average terrain of 413 meters and a directional antenna. The WCES site is located at North Latitude 33° 15' 33" and West Longitude 82° 17' 09". The proposed site is well outside the 47.0 dBu Grade B contour of WCES, and will not have an interfering contour (59 dBu 50/10) overlapping the 47 dBu contour of WCES. The 47 dBu service contour for WCES was plotted and the 59 dBu 50/10 interfering contour of the proposed new NCE facility. See the exhibit B-1 map
