

**EXHIBIT #17-1**  
**RADIO FREQUENCY RADIATION STATEMENT**  
**Modification of Construction Permit**  
**BP-19970613AR**  
**WSWK – 1690 kHz 10/1 kW Unlimited**  
**Avondale Estates, Georgia**  
July 2001

This application proposes to co-locate 1690 kHz with 10 kW day and 1 kW at night on the center tower of the WATB 1430 kHz 1 kW directional antenna system. WATB operates with a three-tower directional antenna system during the daytime only.

A security fence will be installed a minimum distance of 3 meters from the base of the proposed antenna. This fence will be marked with signs warning of a potential radiation hazard.

During times of maintenance around the antenna the applicant will cooperate with persons requiring access to the antenna and will either decrease power or cease operation during this time.

It is believed that this proposal is in compliance with ANSI standards as prescribed in OST Bulletin #65.
