Zoe Communications Inc. holds a FM construction permit BPH-20081010AOZ  
Call sign WDMO facility ID 65632.

The Shively test report shows that the antenna pattern meets the requirements of the  
Technical Specifications described in section III-B-FM engineering of the said  
construction permit.

The Shively 2 bay antenna was installed exactly as the manufacturer specified, I observed  
the entire installation and reviewed the Proof of Performance documents. The contents of  
this report are true and accurate to the best of my knowledge. I am the Director of  
Engineering for Zoe Communications and have been employed as a broadcast engineer  
for more than 20 years.

Michael J. Oberg  
Zoe Communications Inc.
