

## Station KNMD-DT • DTV Channel 9 • Santa Fe, New Mexico

### Environmental Considerations

An Environmental Assessment is not required, as grant of this application would not be considered a major environmental action.

The proposed transmitting antenna will be mounted on tower that does not require registration with the Commission. None of the conditions specified in Section 1.1307(a) of the FCC Rules, concerning actions that may have a significant effect on the environment, are believed to apply.

The proposed transmitting facilities can comply with the FCC guidelines limiting public and occupational exposure to radio frequency energy. The maximum power density level at ground level, calculated in accordance with OET Bulletin No. 65 (August 1997), for the proposed KNMD-DT operation, by itself, is 1.9% of the 0.2 mW/cm<sup>2</sup> public exposure guideline applying at TV Channel 9, and therefore is excluded by FCC Rules from having to consider the contributions of other stations at the site.
