

**EXHIBIT 1**

By this application, First Media Radio, LLC, licensee of WZWW(FM), Bellefonte, Pennsylvania, proposes to cover its construction permit that corrected the geographic coordinates for WZWW(FM). *See* FCC File No. BPH-20010502AAT. As described in the construction permit application, the geographic coordinate correction is necessary due to a survey of the WZWW(FM) antenna site. The survey, which was conducted in connection with the antenna structure registration process, revealed that coordinates for WZWW(FM) are slightly different from what was recorded based on earlier methods of measurement.

The license for WZWW(FM) (BLH-19900725KC) lists the following coordinates (based on the 1927 North American Datum):

40° 53' 32" North Latitude  
77° 51' 49" West Longitude

The FCC Antenna Structure Registration (Registration No. 1216090), the most recent FAA Determination of No Hazard for this site (01-AEA-1609-OE), and the station's construction permit contain the correct coordinates, and they are as follows (based on the 1927 North American Datum):

40° 53' 35" North Latitude  
77° 51' 48" West Longitude

No physical changes are proposed by this application or the underlying construction permit.
