

## **Exhibit 11 Attachment**

### **Unconditional Acceptance of and Non-Objection to Predicted Interference From and to Co-Owned Facilities, Pursuant to Section 74.703(a)**

Pursuant to FCC Rule Section 74.703(a), The University of North Carolina (“UNC-TV”) hereby consents unconditionally to any excess interference that might occur between or among the following TV Translator facilities as a result of the instant application and other applications filed contemporaneously with the instant application. All of the following facilities are owned and operated by UNC-TV:

- **W46AX** (File No. BLTT-19960430JK)
- **W35AD** (File No. BLTT-19850910IB)
- **W42AT** (File No. BLTT-19930405JJ)
- **W27AB** (File No. BLTT-1989 and its pending application for a digital companion channel, which includes a copy of this Unconditional Acceptance of and Non-Objection to Predicted Interference from and to Co-Owned Facilities, Pursuant to Section 74.7039a)).
- **W28AN** (File No. BLTT-19900925IE and its pending application for a digital companion channel, which includes a copy of this Unconditional Acceptance of and Non-Objection to Predicted Interference from and to Co-Owned Facilities, Pursuant to Section 74.7039a)).
- **W24AU** (File No. BLTT-19930212IE and its pending application for a digital companion channel, which includes a copy of this Unconditional Acceptance of and Non-Objection to Predicted Interference from and to Co-Owned Facilities, Pursuant to Section 74.7039a)).
- **W27BD** (File No. BLTT-20060222ABG and its pending application for a digital companion channel, which includes a copy of this Unconditional Acceptance of and Non-Objection to Predicted Interference from and to Co-Owned Facilities, Pursuant to Section 74.7039a)).
- **W05AU** (File No. BLTTV-19950519IB and its pending application for a digital companion channel, which includes a copy of this Unconditional Acceptance of and Non-Objection to Predicted Interference from and to Co-Owned Facilities, Pursuant to Section 74.7039a)).

- **W19CR** (File No. BLTT-20031014ADV and its digital flash cut application, BDFCDTT-20060727).
- **W52BA** (File No. BLTT-19920623JC and its application for channel displacement, File No. BDISDTT-20060727AHF).
- **W68DM** (File No. BLTT-20020502AAA and its application for channel displacement, File No. BDISDTT-20060727AHH).
- **W65DT** (File No. BLTT-20020320ACA and its application for channel displacement, File No. BDISDTT-20060727AHL).

As discussed in the technical exhibit to the instant application, Longley-Rice coverage studies show that interference between and among the above referenced stations is likely in excess of the *de minimis* amounts allowed by Rule Section 74.793. Most of the interference in the stations' area is predicted to occur on mountaintops, where the terrain is very rugged and where few viewers are located – most viewers are located well below the high mountaintops located between the various translator facilities. Each of these stations does not receive interference from all the others but, in aggregate, mutual interference is possible between some stations. The proposed interference is acceptable to UNC-TV and the instant application does not cause prohibited interference within the principle service communities.
