Section III Engineering
KOAI (FM) Ch 262

Infinity KOAI - FM, Inc. (here-in Infinity), the licensee of KOAI (FM), proposes to relocate the transmitting antenna location of KOAI (FM). The Licensee proposes to use an omni directional antenna, 18.5 kW average radiated power at 474 Meters HAAT, Coordinates NAD 27 -32-32- 35.5 N, 096-57-32.0 W.

The proposed transmitter site is short-spaced to KRVF (FM), Ch 295C3 and a Rule Making Petition RB-bg-50, Groesbeck, TX.

KRVF (FM) is third channel adjacent to KOAI (FM). The proposed KOAI (FM) Site will be 73.44 kilometers from the site authorized for KRVF (FM). This is 2.6 Kilometers short of the spacing minimum of 76 Kilometers.

KRVF (FM) is operating pending grant of license application file number BPH-20020930ABW covering Construction Permit BLH-20030113ACP.

Since the proposed site is short spaced to KRVF (FM) under C.F.R. 47 §73.207, Infinity requests that this application be processed under C.F.R. 47 §73.215. The proposed site meets the spacing and contour overlap criteria in §73.215. The minimum spacing is 70 km and KOAI (FM) will be 73.44km.

The KOAI (FM) contour does not overlap the protected KRVF (FM) contour. The contour overlap criteria will be met as illustrated in Spacing Study #3.

The proposed KOAI (FM) site is also short spaced to RM bg-50 under C.F.R. 47 §73.207. Infinity requests that this application also be processed under C.F.R. 47 §73.215 with respect to the Rulemaking RM bg-50. The proposed KOAI (FM) site meets the spacing and contour overlap criteria in §73.215. The minimum spacing is 111 km and

KOAI (FM) will be 128.5 km. The spacing is within the §73.215 minimum and there is not any contour overlap as shown in Spacing Study #3.

Spacing studies 1, 2 and 3 show the 73.207, 73.215 spacing of KRVF (FM) and the proposed Rulemaking RM bg-50 and any other potentially affected existing Stations, Allocations or Construction Permits.

Spacing Study 1, Section 73.207
