BROADSOUTH COMMUNICATIONS, INC.
WDXX (FM) RADIO STATION
CH 261C2 - 100.1 MHZ - 40.5 KW
SELMA, ALABAMA
June 2012

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Broadsouth Communications, Inc. ("BCI"), licensee of WDXX, Channel 261C2, Selma, Alabama. BCI also holds an outstanding construction permit (BPH-20110930AAV). BCI herein proposes to modify the permit by decreasing the effective radiated power. This change will be made at the authorized WDXX CP site. The NED 30 meter terrain database was used for all calculations included in this instant application.

BCI is proposing to implement this change at a new tower site. As such, the Federal Aviation Administration was apprised of this proposal and a Determination of No Hazard was issued. The tower has been registered with the Commission and assigned Antenna Structure Registration Number 1274192.

At the proposed/authorized WDXX site, Channel 261C2 does not meet the Commission's minimum distance separation requirements to two other stations. As such, processing pursuant to §73.215 is requested. See Exhibit A for details.

BCI is also the owner of AM station WHBB, 1490 kHz, Selma, Alabama. Since BCI has an attributable interest in one FM station and one AM station in the same non-rated market, BCI is in compliance with §73.3555(a)(1)(iv) of the Commission's multiple ownership rules.

All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to BCI and is available to the Commission upon request.¹

1) The undersigned has evaluated only the radio frequency radiation exposure in this proposal. All data was extracted from the CDBS database on the date indicated on the spacing study. We assume no liability for errors or omissions in that database which may be adverse to the information contained herein.
