To whom it may concern:

I, John Nousain, licensee by the State of Michigan, license number 41106, do hereby certify that I was present and did witness the installation of the directional antenna manufactured by Propagation Systems, Inc. for the NCE FM radio station owned and operated by Muskegon Community Radio Service Broadcasting Company, Inc., call sign WHEY, 88.9 FM.

On this date, 11-11-2008, I did set an azimuth marker of 110 degrees. Due to constraints of the topography and foliage an azimuth marker of 290 degrees was unable to be set. The installer used my reference mark as the back azimuth and set the proper alignment of the directional antenna towards 290 degrees as specified by the antenna manufacturer.

Signed,

John Nousain
