

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. (“CCBL”). CCBL proposes to modify WFKS(FM) and WROO(FM) in conjunction with proposed modifications to WQIK-FM, which is owned by a CCBL affiliate. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Call Sign	City of License	Facilities
WFXJ(AM)	Jacksonville, FL	930 kHz, 5 kW, U,
WJGR(AM) ¹	Jacksonville, FL	1320 kHz, 5 kW, U,
WZAZ(AM)	Jacksonville, FL	1400 kHz, 1 kW, U,
WJBT(FM)	Green Cove Springs, FL	Channel 224A, 2.6 kW,
WPLA(FM)	Callahan, FL	Channel 227C2, 50 kW,
WFKS(FM) ²	Neptune Beach, FL	Channel 250C2, 12.4 kW,
WQIK-FM ³	Jacksonville, FL	Channel 256C, 100 kW,
WSOL-FM	Brunswick, FL	Channel 268C, 100 kW,
WROO(FM) ⁴	Jacksonville, FL	Channel 297C1, 100 kW,

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission multiple ownership rules.⁵

Radio Markets

The “radio market” applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community

¹ There is a granted construction permit for WJGR(AM) to modify its facilities. This facility is included in this study.

² WFKS(FM) is proposing to modify its facilities to specify 12.4 kilowatts and 302 meters height above average terrain. This proposed facility is included in this study as WFKS(FM)(PROPOSED). WFKS(FM)(PROPOSED) does not change the count of intersecting or overlapping stations in either market. WFKS(FM)(PROPOSED) also effectuates an approved change in WFKS(FM)'s community of license from St. Augustine to Neptune Beach, Florida. For the sake of consistency, all references to WFKS(FM) will refer to its new community of license.

³ WQIK-FM is proposing to modify its facilities to specify 100 kilowatts and 302 meters height above average terrain. This proposed facility is included in this study as WQIK-FM(PROPOSED). WQIK-FM(PROPOSED) does not change the count of intersecting or overlapping stations in either market.

⁴ WROO(FM) is proposing to modify its facilities to specify 98.3 kilowatts and 302 meters height above average terrain. This proposed facility is included in this study as WROO(FM)(PROPOSED). WROO(FM)(PROPOSED) does not change the count of intersecting or overlapping stations in either market.

⁵ See Section 73.3555 of the FCC Rules.

contours of the commonly owned stations. The predicted principal contours of WFXJ(AM), WJGR(AM), WZAZ(AM), WJBT(FM), WPLA(FM), WFKS(FM), WQIK-FM, WSOL-FM and WROO(FM) are shown in Figure 1 herein. There are two “radio markets” for analysis under the Commission’s Rules.

Market 1 is defined by the principal community contours of WFXJ(AM), WJGR(AM), WZAZ(AM), WPLA(FM), WFKS(FM)(LIC) or WFKS(FM)(PROPOSED), WQIK-FM(LIC) or WQIK-FM(PROPOSED), WSOL-FM and WROO(FM)(LIC) or WROO(FM)(PROPOSED).

Market 2 is defined by the principal community contours of WFXJ(AM), WJGR(AM), WZAZ(AM), WJBT(FM), WFKS(FM)(LIC) or WFKS(FM)(PROPOSED), WQIK-FM(LIC) or WQIK-FM(PROPOSED) and WROO(FM).

Count of Stations in Defined Markets

The number of radio stations in each “radio market” is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject co-owned stations.

In Market 1, there are 59 radio stations (28 AM and 31 FM), including the subject co-owned stations, that intersect or overlap the “radio market.”

In Market 2, there are 46 radio stations (24 AM and 22 FM), including the subject co-owned stations, that intersect or overlap the “radio market.”

Figure 2 is the tabulation of the other radio stations identified in each of the defined radio market. Only known licensed, operation commercial stations were employed for the study. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials spaced ever 10 degrees of azimuth.

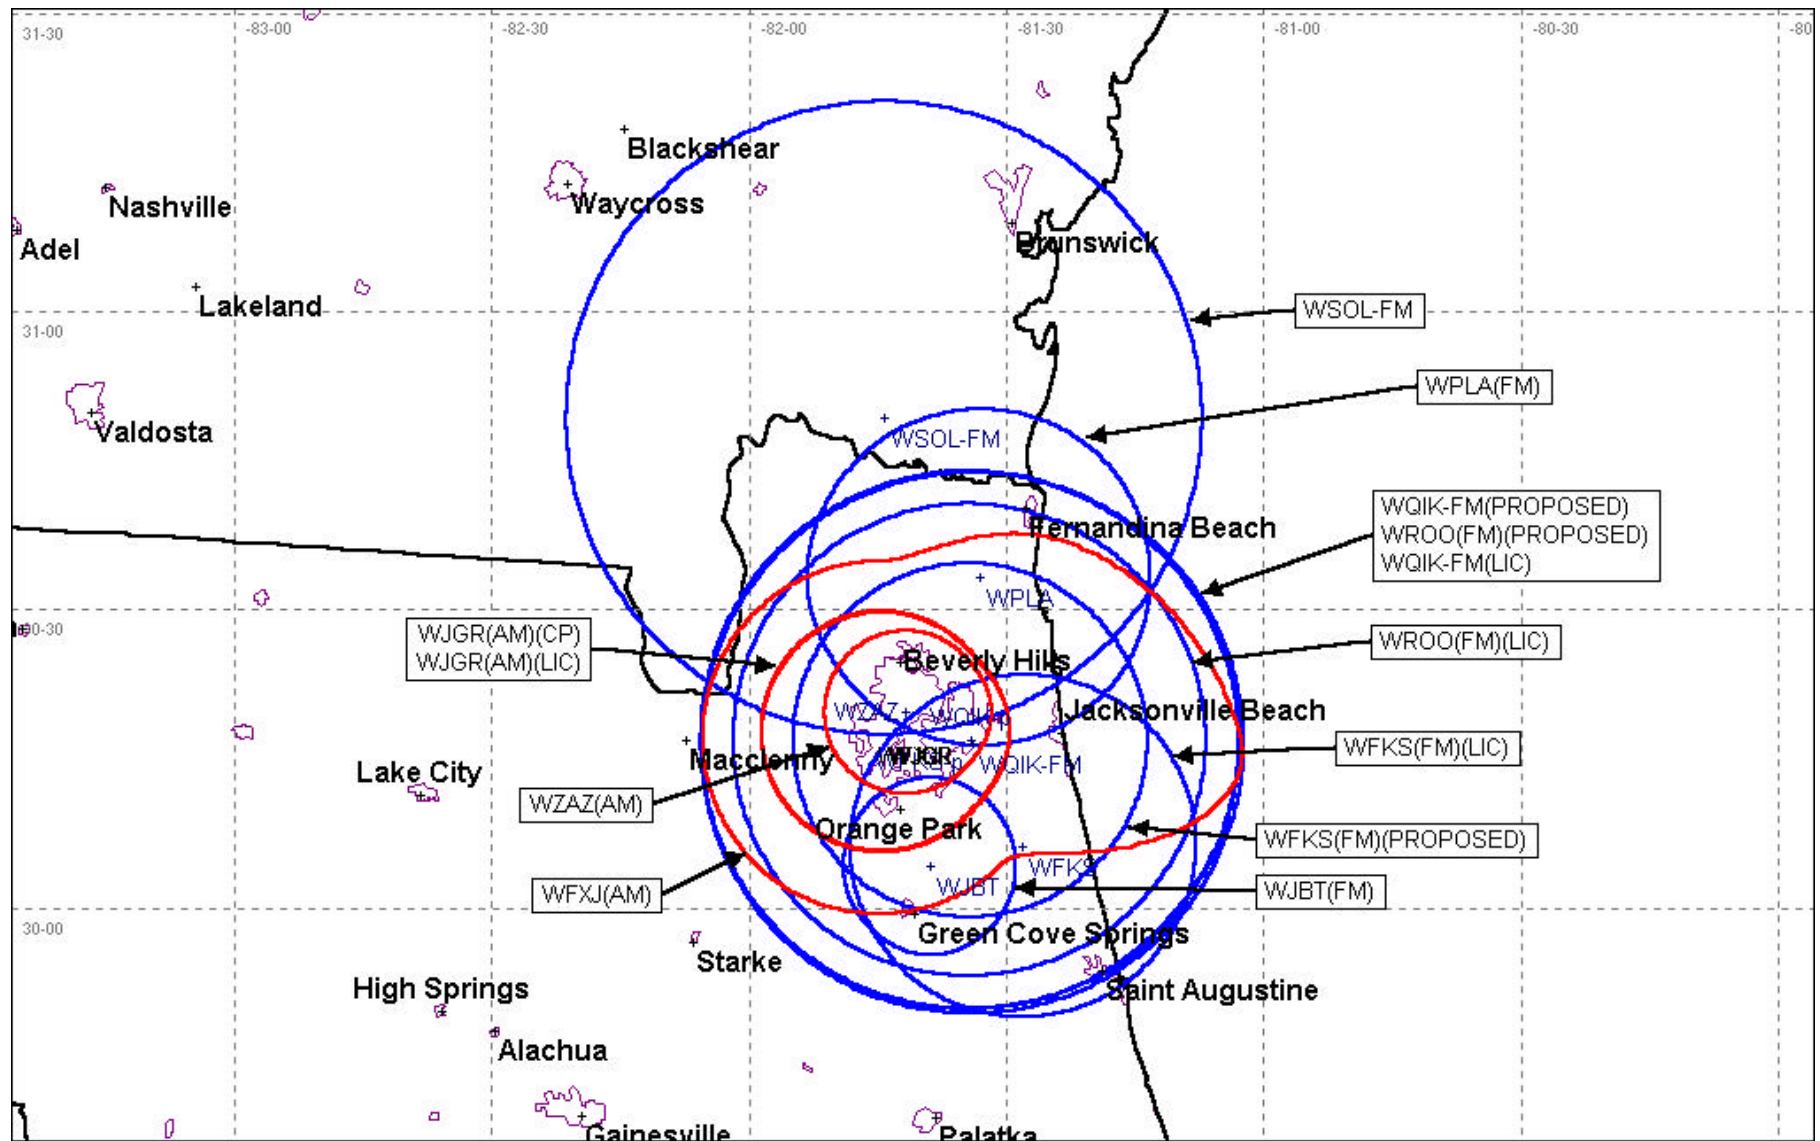

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.
