Bill,

Jampro Antennas has reviewed your request for installing a single piece of 1/2" flexible transmission line through the aperture of the WYPR JADP-1/3 (3) FM Directional Antenna located in Baltimore, MD, FCC Facility ID# 65753. It is Jampro's determination that installing the transmission line mentioned above in the web of the angle leg no further than two inches from the vertical metal at any point five feet above or below the aperture will not cause the WYPR azimuth radiation pattern to exceed its limits. While we feel confident in our analysis it is Jampro's recommendation that this be verified by an independent Professional Engineer. We in no way accept any liability for disturbance from current WYPR radio coverage or service.

Best regards,

Douglas M. McCabe
Chief Operations Officer
Jampro Antennas, Inc.
