Avon, IN 46123

**Consent to Operation/Waiver of Condition**

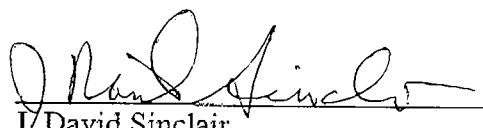

Commonwealth Radio, L.L.C., licensee of WNIS(AM), Norfolk, Virginia, hereby acknowledges that Commonwealth Broadcasting, L.L.C., licensee of WPYA(FM), Poquoson, Virginia, holds a construction permit which specifies that the transmitting antenna for WPYA(FM) is to be mounted on one of the WNIS(AM) towers, and that such construction permit includes a condition that partial proofs of performance be conducted both before and after the installation of the WPYA(FM) antenna. Commonwealth Radio, L.L.C. further acknowledges that, due to the fact that the tower in question was in the process of being taken down and reconstructed prior to the grant of the WPYA(FM) construction permit, it was impossible for the condition with regard to a pre-installation proof of performance to be met.

Accordingly, Commonwealth Radio, L.L.C. hereby states that it has granted permission to Commonwealth Broadcasting, L.L.C. to begin and continue operation of WPYA(FM) pursuant to program test authority at the WNIS(AM) transmitter site pending the performance of a post-construction proof, and it waives the benefit of the referenced condition for a pre-installation proof on the WPYA(FM) construction permit.

Dated this 22<sup>nd</sup> day of March, 2004.

COMMONWEALTH RADIO, L.L.C.
