Re: Radio Vision Cristiana Subsidiary Corp.
KCKN(AM), Roswell, New Mexico
Facility ID No. 57721
License Application: BMML20150731AUJ

Dear Counsel:

This letter is in reference to the above-captioned license application for station KCKN(AM).

A preliminary engineering study of the license application revealed the following deficiency:

1. Please show that the sample lines are equal within 1° and that the characteristic impedances are within 2 ohms of each other. A table with the measured resonant frequency closest to 1020 kHz, the line length, the characteristic impedance, and the frequency used to determine the characteristic impedance should be shown in the table for each individual line.

Further action on the subject application will be withheld until the applicant submits an amendment. Failure to respond within 60 days from the date of this letter may result in the dismissal of the application pursuant to Section 73.3568 of the rules. For questions, please contact the processing engineer.

Sincerely,

Jerome J. Manarchuck
