

Exhibit E-43

The proposed facility should be exempt from environmental processing as it does not involve a site location specified in Section 1.1307(a), does not utilize high-intensity obstruction lighting and would not constitute an RF radiation hazard to persons at the site.

The applicant certifies that they will, in coordination with other users of the site, reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic exposure in excess of FCC guidelines.
