

WDCM-LP
Ch. 225, 92.9 MHZ.

New site: 41° 18' 26" N. 84° 22' 19" W

The site proposed in the initial CP is a cellular tower near downtown Defiance. There are no enclosures or other facilities at this site for the transmission equipment for the low power station. A separate AC feed would need to be installed.

The owners of this tower offered as an alternative site a 100 ft. self-supporting tower to the north of downtown. This tower had previously been used for an unlicensed wireless service. An adjacent structure is available for the transmission equipment.

Distance from previous site: 1.84 KM. The site otherwise meets all minimum spacing requirements. There are no translators on either co-channel or adjacent frequencies within 39 KM. of this site.

92.3	WOWO-FM (A)	Ft. Wayne, IN	72.00 KM.	Required: 29 KM
92.5	WVKS (B)	Toledo, OH	69.73 KM.	Required: 67 KM
92.7	WZBD (A)	Berne, IN	76.08 KM.	Required: 56 KM
