MULTIPLE OWNERSHIP SERVICE CONTOUR ANALYSIS

**Prepared for
MCC Radio, LLC
January 2007**

The attached analysis of compliance with the radio multiple ownership rules was prepared in accordance with the Rules and Regulations of the Federal Communications Commission, in connection with a minor change application for station KSAJ-FM (Facility ID #18055).

Unrated Market

Burlington, the new KSAJ-FM community of license is located in Osage County, which is within the Arbitron Topeka market. However, since the proposed KSAJ-FM 70 dBu contour will overlap an attributable station located outside any rated market, the following analysis has been conducted. (Ownership issues within the rated Topeka market are being addressed in a separate exhibit.)

KSAJ-FM has principal community contour with the following attributable station(s) operating in unrated areas:

KBLS(FM) 273C1 North Fort Riley

In addition, attributable stations WIBW-FM and WIBW(AM), both licensed to Topeka, also have principal community contour overlap with KBLS(FM) in the same area. Therefore, a contour-based ownership analysis of these four stations has been made consistent with the Commission's interim rules for unrated markets. The 70 dBu contours of FM stations were determined from the technical data contained in the most recent edition of the FCC FM Database. The listed antenna height above average terrain was used together with topographic data obtained from the digitized 30 second or 3 second database. The 5 mV/m daytime contours of AM stations were determined

from the technical data contained in the most recent edition of the FCC AM Database. The listed antenna parameter information was used together with a digitized version of the FCC M-3 or Region II ground conductivity database.

The service contours were plotted using correct map projection mathematics. Those stations whose transmitter sites are within the respective principal community service contours of the stations proposed to be commonly owned have only the sites rather than their contours shown. All contours and enclosed transmitter site locations have been labeled. A list of all stations considered is included with this statement.

In counting stations providing service to the "market" defined by each of the discrete clusters formed in unrated markets, stations whose transmitter sites are located in excess of 92 km from the perimeter of the common overlap area have been excluded, as have other stations to be commonly-owned but which are not a part of the discrete cluster being studied.

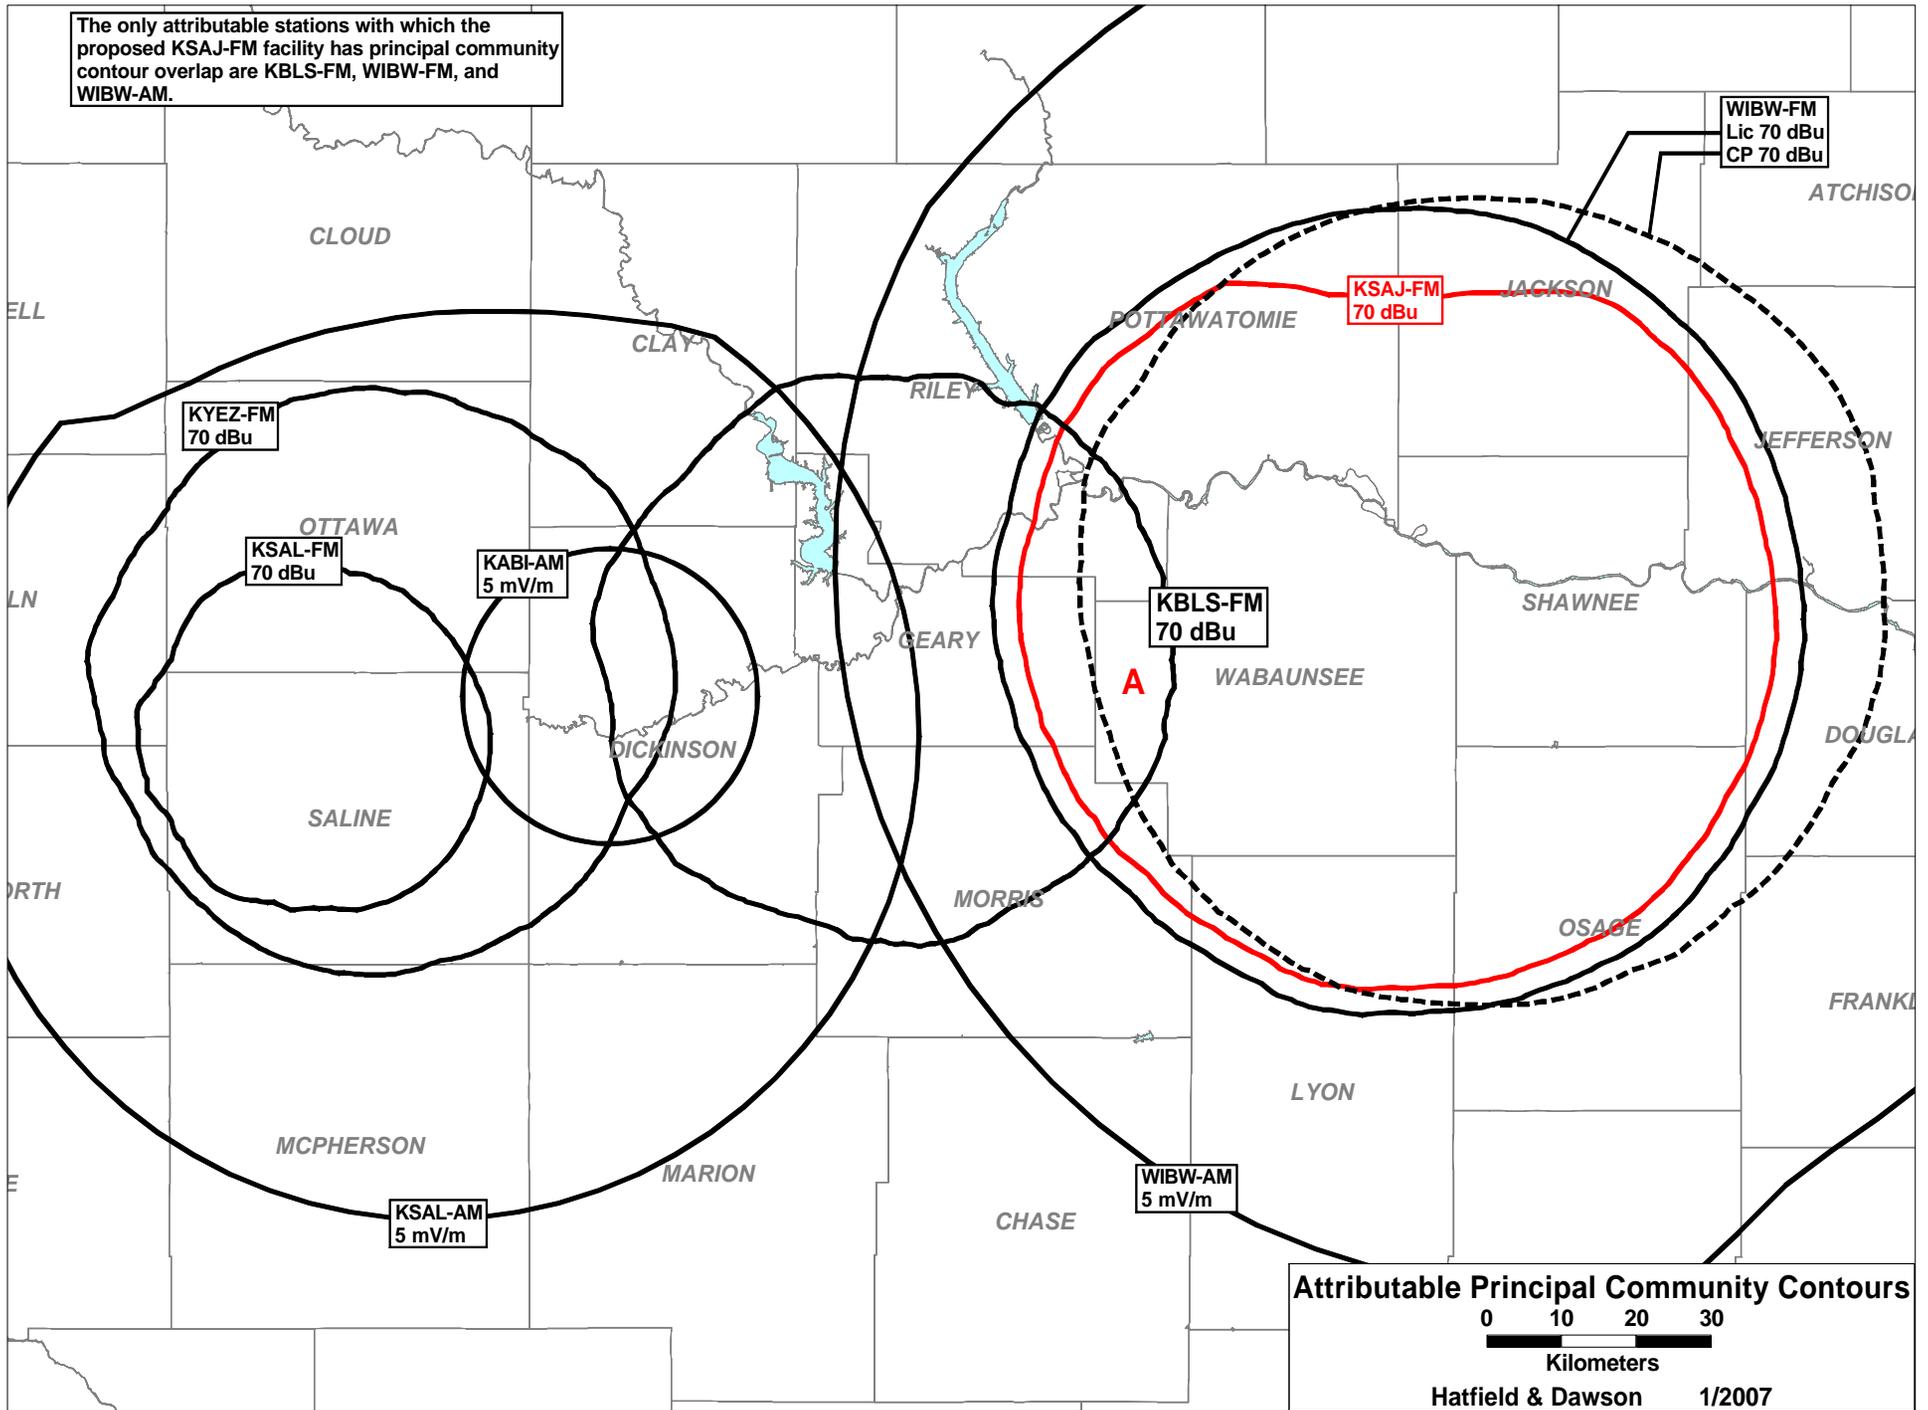

This exhibit evidences at least the minimum number of stations necessary to demonstrate compliance with the rules concerning radio multiple ownership in unrated markets. In order to qualify for common ownership of this 1AM/3FM cluster, there must be at least 8 stations in the relevant "market". This study demonstrates that there are at least 18 stations in the relevant market. (In fact, numerous other stations also provide service to this market.)

January 10, 2007

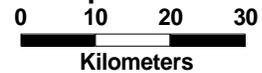

A handwritten signature in black ink, appearing to read "Erik C. Swanson". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Erik C. Swanson

The only attributable stations with which the proposed KSAJ-FM facility has principal community contour overlap are KBLs-FM, WIBW-FM, and WIBW-AM.

Attributable Principal Community Contours

**AM STATIONS WITH 5 mV/m CONTOURS OVERLAPPING
70 dBu CONTOURS OF KSAJ-FM, KBL5, WIBW-FM
AND 5 mV/m CONTOUR OF WIBW**
