*Pursuant to § 74.1204 (a) "An application for an FM translator station will not be accepted for filing if the proposed operation would involve overlap of predicted field contours with any other **authorized** commercial or noncommercial educational FM broadcast stations, FM translators, and Class D (secondary) noncommercial educational FM stations." Since 19981015MB is **not an authorized station but is an application**, it does not preclude LACR's use of the channel unless the FCC grants their proposal. However, in the event 19981015MB does get granted, LACR certifies it will request minor changes to comply with § 74.1204 (a)(3) by eliminating the contour overlap by one or more of (but not limited to) the following means: use of directional antenna, reduction in ERP, minor change of channel and/or minor change of location.
