

INTERFERENCE CERTIFICATION

Applicant has utilized the latest version of Comstudy 2.2.12.56, an engineering software program, to ascertain possible interference concerns. This program computes both contour and Longley-Rice interference. Having completed those computations, there was no interference found other than the following:

KOCB	(CP)	0.3%
KOCB	(LIC)	0.4%

These are within the Commission's established standards for permitted interference. Consequently, this application may be granted.
