

Lima, Ohio Combination

Frequency proposes to acquire the licenses of the following six radio stations which have overlapping principal community contours and/or are listed as “home” to an Arbitron Metro market or are licensed to a community within the geographic boundaries of an Arbitron Metro market:

<i>Station</i>	<i>Community</i>	<i>Current Licensee</i>
WBUK(FM)	Ottawa, Ohio	Citicasters
WIMA(AM)	Lima, Ohio	Jacor
WIMT(FM)	Lima, Ohio	Jacor
WLWD(FM)	Columbus Grove, Ohio	CC Licenses
WMLX(FM)	St. Marys, Ohio	Jacor
WZRX-FM	Fort Shawnee, Ohio	Jacor

As described below and in the attached Engineering Statement, the instant application complies with the FCC’s current local radio ownership rules utilizing the Commission’s modified contour overlap methodology.¹ Clear Channel Communications’ current interests in the six stations listed above is a “grandfathered” combination, as it complies with the multiple ownership rules under the contour overlap methodology and pre-dates the effective date of the Arbitron Metro market methodology adopted by the Commission in 2003.² Frequency proposes to assign the license of at least one of the stations listed above to a divestiture trust prior to or contemporaneously with the closing of the merger. Upon the completion of these transactions, Frequency’s attributable interests in the Lima, Ohio Arbitron metro market will comply with the Commission’s local radio ownership rule under the Arbitron Markets methodology.

Arbitron Markets Methodology: All six stations identified above are listed by Arbitron as “home” to the Lima, Ohio radio market.³ The communities of license of all stations except WBUK(FM), Ottawa, Ohio and WLWD(FM), Columbus Grove, Ohio, are located within the geographic boundaries of that market. The BIA Media Access Pro Database identifies eighteen full-power commercial and non-commercial stations as “home” to or licensed within the Lima market. Frequency may hold attributable interests in only four of the five FM stations listed above in this market, and accordingly, Frequency proposes to assign the license of one of the stations listed above to a properly

¹ See 2002 Biennial Regulatory Review – Review of the Commission’s Broadcast Ownership Rules and Other Rules Adopted Pursuant to Section 202 of the Telecommunications Act of 1996, *Report & Order & Notice of Proposed Rulemaking*, 18 FCC Rcd 13,620, ¶ 285 (2003) (“*Biennial Review*”).

² Biennial Review at ¶484.

insulated divestiture trust prior to or contemporaneously with the closing of the transactions contemplated by the instant application. After assignment to the trust, Frequency's interests in the Lima market will comply with the local radio ownership rule under the Arbitron Metro Market methodology.

Modified Contour Overlap Methodology: As detailed in the attached Engineering Statement, the principal community contours of a number of the stations listed above overlap each other, creating two separate radio markets in which Frequency proposes to hold an attributable interest.

Market 1. Overlap of the principal community contours of WBUK(FM), WIMT(FM), WLWD(FM), and WIMA(AM) creates one radio market for application of the Commission's modified contour overlap methodology. As shown in the attached Engineering Statement, this market includes at least twenty-five additional full-power stations in which Frequency does not propose to hold an attributable interest, for a total market of twenty-nine full-power radio stations. Consequently, Frequency's proposed ownership of three FM stations and one AM station in this market complies with the Commission's local radio ownership rule.

Market 2. Overlap of the principal community contours of WIMT(FM), WLWD(FM), WMLX(FM), WZR(X)FM, and WIMA(AM) creates a second radio market for application of the Commission's modified contour overlap methodology. As shown in the attached Engineering Statement, this market includes at least twenty-six additional full-power stations in which Frequency does not propose to hold an attributable interest, for a total market of thirty-one full-power radio stations. Consequently, Frequency's proposed ownership of four FM stations and one AM station in this market complies with the Commission's local radio ownership rule.

ENGINEERING STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
LIMA, OHIO

This radio multiple ownership analysis was prepared to consider common ownership of the stations tabulated below under the FCC “Interim” contour analysis method. * GoodRadio.TV License, LLC. is acquiring several radio stations in the Lima, Ohio area. Below is a tabulation of facilities for each station.

Call Sign / Facility ID	Location	Facilities
WBUK(FM)/40172	Ottawa, OH	CH 292A 1.4 kW 149 M
WIMT(FM)/37497	Lima, OH	CH 271B 11 kW 323 M
WLWD(FM)/40714	Columbus Grove, OH	CH 230B1 14 kW 133 M
WMLX(FM)/37499	St. Marys, OH	CH 277A 1.95 KW 170 M
WZRFX-FM/8061	Fort Shawnee, OH	CH 298A 1.35 kW 151 M
WIMA(AM)/37498	Lima, OH	1150 kHz 1 kW-U DA-N

The principal community contours of these stations are depicted on a map included herein as Figure 1. Since the principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations) of some of the stations are involved in mutual overlap, an ownership study was prepared in accordance with the Federal Communications Commission multiple ownership rules as outlined in Section 73.3555.

* See Report and Order and Notice of Proposed Rulemaking, MB Docket 02-277, FCC 03-127, Released July 2, 2003.

Radio Markets

The “radio markets” applicable to common ownership of the subject stations are defined as the areas encompassed by the mutually overlapping principal community contours of the stations proposed to be commonly owned. The table below lists the defined markets:

Defined Radio Market	Stations that Define Radio Market	
	AM Stations	FM Stations
Market 1	WIMA	WBUK/WIMT/WLWD
Market 2	WIMA	WIMT/WLWD/WMLX/WZRZ

Count of Stations in the Defined Market

The number of radio stations in a “radio market” is determined by counting the operating stations having principal community contours which overlap or intersect the principal community contours which define the radio market. Only those stations located within 92 km of the perimeter of the mutual overlap area of the defined market area were employed in the count of stations. Commonly owned stations were not considered in the count of stations in the defined markets. The results of the analysis are tabulated below:

Defined Radio Markets	Minimum Number of Other Stations in the Radio Market
Market 1	7 AM, 18 FM; 25 Total
Market 2	6 AM, 20 FM; 26 Total

Figure 2 are tabulations of the radio stations identified in the defined radio market. Only known licensed, operating stations were employed for the study. Distances to the AM coverage contours were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivity data were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials evenly-spaced every 45 degrees of azimuth.
