

Exhibit 4  
FCC Engineering STA  
American Educational Broadcasting, Inc.

January 19, 2007

American Educational Broadcasting, Inc., licensee of KQMC (Fac. ID 79036, Hawthorne Nevada) hereby requests a grant of this STA request so that it may transmit from an alternate site pursuant to 47 C.F.R. § 73.1635 of the Commission's rules.

Weather conditions at the current transmitter site are causing intermittent outages. Because of the nature of the current transmitter location, these weather conditions are also preventing station personnel from accessing the transmitter site for days at a time.

The proposed transmitter facilities would be at the main studio location and at a lower height than the present facilities. This change would allow for more reliable operations in all weather conditions and would allow for year-round access to the transmitter site.

The licensee is working to file an application for a construction permit to establish a permanent facility at a site which will be regularly accessible. In the interim, in order to maintain service by KQMC, this STA is requested.

The public interest would be served by approving the proposed STA by improving the quality and reliability of the service provided by station KQMC.
