

**ANTENNA SPECIFICATIONS**

Compliance with 47 C.F.R. Section 73.682(a)(14)

**Antenna polarization:** The proposed antenna employs horizontal polarization. No vertical polarization is proposed, thus the antenna is in compliance with 47 C.F.R. Section 73.682(a)(14).

Compliance with 47 C.F.R. Section 73.625(c) and 73.685

**Antenna location:** The proposed KBLR-DT antenna will be located on Black Mountain, one of two main antenna farms serving the Las Vegas area.

**Directional antenna:** A directional antenna is proposed. The azimuth pattern was designed to match that of the antenna specified in BMPCDT20050126AJL. The antenna is a side-mounted slotted coaxial antenna. Tabulated antenna azimuth and elevation pattern data is attached. Azimuth and elevation relative field pattern plots are included. Azimuth and elevation pattern plots showing radiated power in dBk can be prepared and provided if required.

**Proximate operation:** The proposed location for the KBLR-DT antenna is over 200 feet from towers with UHF broadcast antennas.
