**Engineering Statement  
in support of a Minor Amendment  
to the application for a new translator  
at  
Angels Camp, California  
BNPFT-20030317GML**

The applicant is requesting a minor tech box amendment to eliminate conflicts and overlaps with the other application in Group 71. The applicant proposes to reduce the proposed effective radiated power and change to Ch. 257. By reducing the effective radiated power and changing the channel, all conflicts are resolved and no prohibited overlap will result.

This proposal is not located within 39 kilometers of any spectrum limited market grid, nor within a top-50 market. Because of this, no LPFM preclusion study is required.

An allocation study, along with detail maps, is attached to this statement. With regard to the small amount of overlap to KCVR, the applicant requests a waiver of FCC 74.1203 because there is no population within the 100 dbu interference contour of the proposal. Please refer to the KCVR map exhibits for clarification.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'D. Mussell', with a stylized flourish at the end.
