

Compliance with Special Operating Conditions

The Construction Permit contains several Special Operating Conditions, summarized as follows:

1. Before program tests commence, the permittee shall make sufficient measurements to establish that the operation authorized in this construction permit is in compliance with the spurious emissions requirements of 47 C.F.R. Section 73.317(b) through 73.317(d). All measurements must be made with all stations simultaneously utilizing the shared antenna. These measurements shall be submitted to the FCC with Form 302-FM.
2. Waiver of 47 C.F.R. Section 73.1125 is granted to allow operation of the facility authorized by this construction permit as a satellite operation of station KLRD-FM.
3. The permittee/licensee, in coordination with other users of the site, must reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
4. Because KAER is to be mounted above co-located directional antenna of K281BD Crystal NV (FIN 157452), the permittee shall submit an exhibit including a statement from the manufacturer of K281BD's directional antenna stating that the proposed antenna will have no adverse effect on the K281BD directional antenna pattern.

Educational Media Foundation ("EMF"), complies with, or agrees to, these conditions, as follows:

1. EMF performed sufficient measurements to establish that the operation authorized in the construction permit is indeed in compliance with the spurious emissions requirements of 47 C.F.R. Section 73.317(b) through 73.317(d). See Exhibit 9A.
2. By letter dated August 23, 2013, the Commission has granted modification of this studio waiver so that KAER is a satellite operation of station KYRA Thousand Oaks CA (FIN 21689). EMF reiterates the commitments outlined in its request for waiver of section 73.1125. See also Exhibit 6.
3. EMF agrees to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
4. After investigation, EMF has learned that K281BD's antenna is not currently mounted on this tower. K281BD has filed an STA to be silent (see BLSTA-20140410AAK) pending grant and construction of BMPFT-20140410AAI (which was granted May 23, 2014). Accordingly, this special operating condition does not apply.

Therefore, all Special Operating Conditions of the KAER Construction Permit (FCC File Number BPED-20110518AAW) have been met.
