Re: KAUU (FM), Manti, Utah
Facility Identification Number: 59034
SLC Divestiture Trust I
Special Temporary Authorization
BESTA-20130607AAN

Dear Counsel:

This is in reference to the request filed June 7, 2013, on behalf of SLC Divestiture Trust I ("SLC"). SLC requests an eighth extension of the special temporary authority ("STA") granted on January 11, 2008, to operate Station KAUU with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, SLC states that its engineers are preparing to install equipment and get the station up and running this summer.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates the licensee has made progress toward restoring licensed operation but additional time is required for completion of the work; thus, extension of STA is warranted.

¹ KAUU is licensed to Manti, Utah, for operation on Channel 286C (105.1 MHz) with effective radiated power ("ERP") of 48 kilowatts (H only) and antenna height above average terrain ("HAAT") of 684 meters. Construction Permit BPH-20080325AID authorizes relocation of the station to American Fork, relocation of the transmitter, and operation with ERP of 15 kW (H&V) and HAAT of 1243 meters. That construction permit expires December 15, 2013.

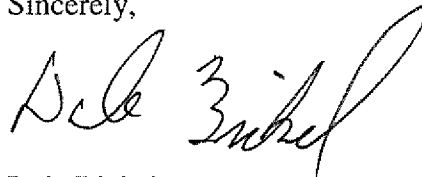

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KAUU may continue to operate with the following facilities:

Geographic coordinates:	40° 16' 58" N, 111° 56' 11" W (NAD 1927)
Channel	286 (105.1 MHz)
Effective radiated power:	0.075 kilowatt (Max-DA, H&V)
Antenna	Nicom, model BKY3P, directional
Antenna orientation	95° True
Antenna height:	
above ground:	17 meters
above mean sea level:	2340 meters
ASRN ²	1251577

SLC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 15, 2013**.

Sincerely,

Dale Bickel
Senior Engineer
