Hispanic Christian Community Network, Inc.  
KQHO-LP, Beaumont, TX: Channel Displacement to 29 Digital

**EXHIBIT 11**

**LPTV CHANNEL DISPLACEMENT TO DIGITAL – INTERFERENCE STUDIES**

1. Hispanic Christian Community Network, Inc. ("Applicant") is the permit holder of KQHO-LP, Beaumont, TX, analog channel 60. By this minor displacement application, Applicant is proposing a channel displacement for digital service on channel 29. Since KQHO-LP currently operates on an out-of-core channel, KQHO-LP qualifies for displacement relief pursuant to 47 CFR Section 73.2572(a)(4)(ii).

2. Attached as Figure 1 (for the current TV environment) and Figure 2 (for the post-transition environment) are the OET-69 study results for the proposed facility (as the referenced station) as determined on a Sun Computer using a Solaris (Unix-based) operating system and using the same OET-69 software as developed for use by the FCC. (According to the software developer, the program used herein provides identical results as the FCC's OET-69 processing program.) As demonstrated by Figures 1 and 2, the proposed facility adequately protects all required US broadcast stations as required by the FCC Rules. All studies are conducted in accordance with current FCC Rules and Regulations.

3. The Applicant accepts any existing and future interference that may result from any primary or secondary TV station that is otherwise deemed to have status priority to the herein-proposed facility.
