

TECHNICAL STATEMENT

KASH-FM, FACILITY ID 12958

Capstar TX Limited Partnership

RADIO MULTIPLE OWNERSHIP ANALYSIS -04/22/2003

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership("CTLP"), a licensee subsidiary of Clear Channel Communications, Inc. CTLP proposes to modify the facilities of KASH-FM. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	Facility_id	City	State
KENI	12516	ANCHORAGE	AK
KTZN	12967	ANCHORAGE	AK
KYMG	12514	ANCHORAGE	AK
KGOT	12515	ANCHORAGE	AK
KASH-FM	12958	ANCHORAGE	AK
KBFX	12962	ANCHORAGE	AK

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules¹.

CCBL does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the proposed facility of KASH-FM.

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form two "radio markets", as shown in *Figure 1*, for analysis under the Commission's rules.

¹ See 47 C.F.R. § 73.3555.

Radio Market "1" is defined by the mutually overlapping principal community contours of KASH-FM (as proposed in the accompanying Form 301 application), KENI(AM), KTZN(AM), KGOT(FM), KYMG(FM) and KBFX(FM) (4 FM, 2 AM) are shown in *Figure 1*.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In Radio Market "1" studied herein, there are over 30 radio stations, including the subject co-owned stations, that overlap or intersect with the contours that define "radio market." *Figure 2* is the tabulation of the radio stations identified in the market.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 5 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham
FCC Engineering Specialist
