

APPLICATION FOR STATION LICENSE
MILLER COMMUNICATIONS, INC.
W227BI FM TRANSLATOR STATION
CH 227D - 93.3 MHZ - 0.085 KW
SUMTER, SOUTH CAROLINA
October 2009

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Miller Communications, Inc. ("MCI"), licensee of FM translator station W227BI, Channel 227D, Sumter, South Carolina. MCI has a construction permit (BPFT-20091001SAJX) to make minor changes to the W227BI facilities. MCI herein submits a license application to cover the outstanding permit. Attached as Exhibit A is a calculation of the transmitter power output for FM translator W227BI. The W227BI construction permit notes that it will retransmit WWBD (FM), Channel 234C3, Sumter, South Carolina. However, in lieu of WWBD, W227BI proposes to retransmit AM station WWHM, 1290 kHz, Sumter, South Carolina. As depicted on Exhibit B, the 60 dBu contour of the authorized W227BI will be wholly contained within the 2.0 mV/m contour of WWHM.

There are two special operating conditions/restrictions listed on the W227BI permit. The first condition states that an application for license, FCC Form 350, must be on file prior to commencing program tests with the facilities authorized in the permit. The submission of this instant application satisfies the condition.

The second condition states that MCI will reduce the power of W227BI or cease operation to insure persons with access to the site are not exposed to radio frequency radiation levels above

the limits. MCI states that it will, in cooperation with other tower users, reduce the power of W227BI or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines. Based on the foregoing, it is believed all conditions on the W227BI construction permit have been satisfied.
