

EXHIBIT 12 – NARRATIVE

Applicant Wendolynn Tellez files this amendment to an existing CP of K252FL, BNPFT – 20130826ACW, Facility ID number 148446, a proposed translator near Port Lavaca, Texas.

This application is NOT an AM Fill-in translator filing. This is a minor change application as permitted by the current FCC rules.

No new interference is created by this application to any licensed facility, CP, application or allocation.

Applicant will construct a 46 meter tall tower at the location indicated in item [4]. Aerial photo of site is included.

Mexico

The site of this application is 310.7 km from the Mexico/US border. The proposed translator 60 dbu contour does not lie within 116.3 km of the common border. This application does comply with the requirements of the Mexico / US Treaty.

Primary station rebroadcast is KMPI, FAC ID 175311 Mc Coy, Texas.

[4] Antenna Location NAD (27): 28 – 46 – 47 N, 96 – 19 – 44 W

[6] Antenna Location Site Elevation AMSL – 7 meters

[7] Overall Tower Height AGL – 46 meters

[8] Height of Radiation Center AGL – 46 meters (H) and (V)

[9] Effective Radiated Power – 0.250 kW (H) and (V)

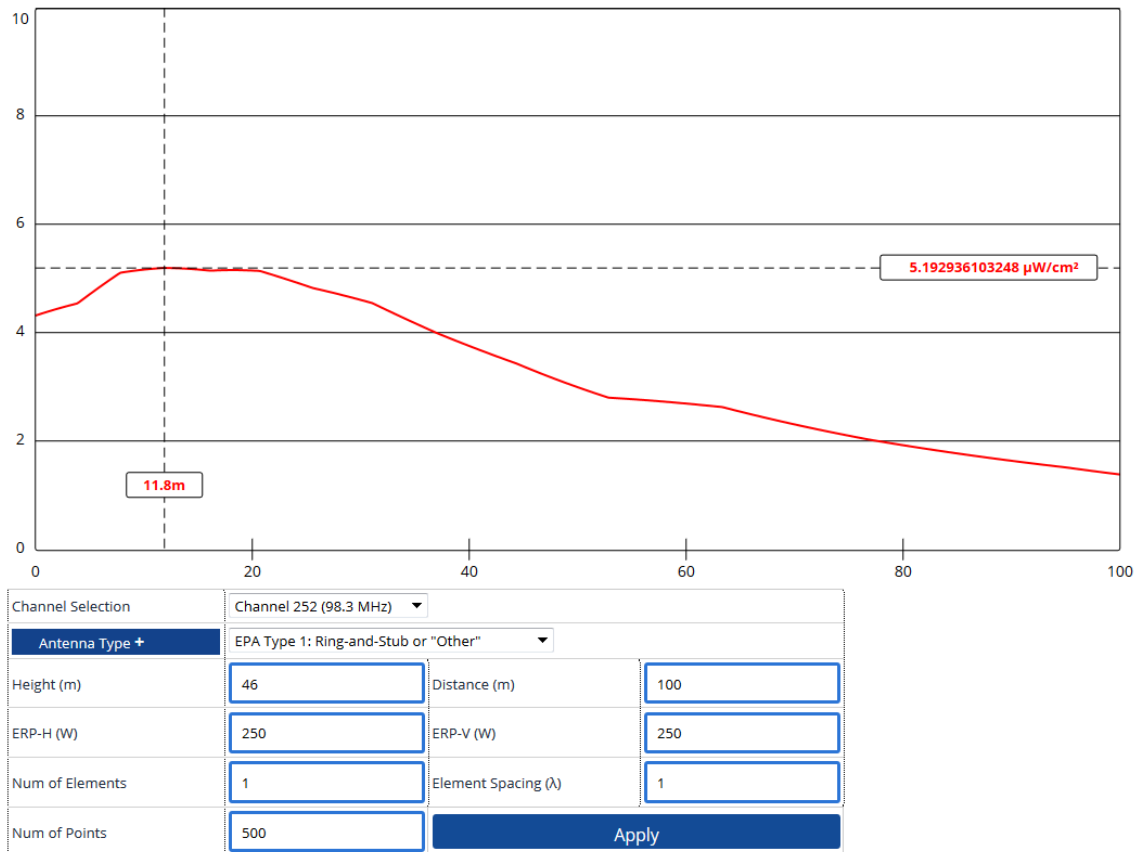

Exhibit 12 – This narrative

Exhibit 13 – Overlap Requirements. Channel Study and 60 db contour overlap of K252FL and proposed K252FL.

Exhibit 17 – RFE

Applicant will use a NICOM BKG88 -1, single bay antenna. This is an EPA Type 1 antenna. Utilizing FCC online FMMODEL software, the calculated RFE is $5.19 \mu\text{W}/\text{cm}^2$, or 2.6%. This is less than 5% of the total allowable uncontrolled public access exposure of $200 \mu\text{W}/\text{cm}^2$, therefore no further study is required.

EXHIBIT 12 – NARRATIVE

Applicant will cease transmitting from this site whenever there are personnel working on the tower.
