

Compliance with Section 1.30002
WLTP(AM) - Marietta, Ohio

The antenna for this translator was mounted on an existing grounded tower located 2.8 kilometers (8.5 wavelengths) from the directional antenna system of WLTP(AM) - Marietta, Ohio. Because this existing tower is not detuned for WLTP (or any other AM station) and the installation of this translator resulted in no change in the overall height of this tower, the installation of this antenna is not considered to be a substantial change, which makes it unnecessary, pursuant to Section 1.30002 of the FCC Rules, to take any steps to verify that the installation of this antenna hasn't impacted WLTP's directional pattern, regardless of any special operating condition to the contrary.
