

TECHICAL STATEMENT
APPLICATION FOR MODIFICATION OF LICENSE
CHARLES RIVER BROADCASTING WCRI LICENSE CORP.
RADIO STATION WCRI
FACILITY ID 67119
BLOCK ISLAND, RHODE ISLAND
CH 240A 6 KW 76 M

This Technical Statement was prepared on behalf of FM station WCRI, Block Island, Rhode Island (Facility ID 67119) in support of an application for modification of license. This modification of license is being filed pursuant to Section 73.1690(c)(10) to increase the transmitter power output to compensate for the installation of a coaxial transfer switch to the transmission line. The coaxial transfer switch is to be used for WCRI's remote control of its main and auxiliary transmitters. The Micro Communications, Inc. Model No. 61103 coaxial transfer switch has an estimated loss of 0.5 decibels (dB). Therefore, WCRI-FM's transmitter power output will be increased by 0.5 dB, from 3.63 kW to 4.07 kW. There will be no change in the effective radiated power (ERP). As further indicated by Section 73.1690(c)(10), this change is to be reported to the FCC in a license modification only.
