PATTERN CERTIFICATION

DIRECTIONAL FM ANTENNA WYFG

April 2, 2010

Station	:	WYFG
Location	:	Gaffney, SC
Frequency	:	91.1 MHz
Channel	:	216C1
Antenna Model	:	FMP5 4-4-4 DA
Maximum Antenna Gain		
Vertical	:	4.852 / 6.859 dB
Horizontal	:	4.852 / 6.859 dB

ANTENNA DESCRIPTION

A custom designed **FMP5 4-4-4 DA** antenna was used to produce the required directional azimuth pattern. Each antenna bay consists of a circularly polarized dipole-radiating element enclosed in a radome attached to a panel grid. The array is comprised of four bays, three around configuration, that are spaced a full wavelength apart and mounted to a tower with an uneven power distributed feed system and skewed to certain azimuth points to produce the required azimuth pattern

DESCRIPTION OF TEST PROCEDURE

A third-scale model antenna was first used to generate single bay Horizontal and Vertical azimuth patterns. The resulting azimuth patterns were then used to computer-generate a final composite azimuth pattern that would satisfy the DA pattern on file with the FCC. The full scale antenna was then fabricated and a 1 bay 3 around configuration was placed on our test range to verify the computer-generated results. The antenna was placed 20 ft. high on a platform and carefully spaced apart according to the antenna's final mounting scenario. All feed cables were properly grounded during the pattern testing. Horizontal and vertical azimuth patterns were generated by varying the amount of power and phasing to each feed cable in the array and skewing the panels to certain azimuth points to ultimately obtain the submitted directional azimuth patterns.

The source antenna, a vertical/horizontal dipole Cavity Back Resonator antenna configuration was mounted approximately 100 feet from the test antenna. The source's height was adjusted to provide a uniform field at the test antenna location. The CBR antenna was operated in the transmit mode at a frequency of 91.1 MHz. The antenna under test was rotated in a clockwise direction. A gain reference was taken using a dipole tuned to 91.1 MHz. Nowhere, does the received signal exceed a maximum to minimum ratio of 15 dB.

619 Industrial Park Road, Ebensburg, PA 15931 ♦ Tel. 800 762 7743 / 814 472 5436 ♦ Fax 814 472 5552 ♦ davide@swr-rf.com

TEST RESULTS

The attached calculations verify that the **RMS** value of this antenna is **95.12 %** of the **RMS** value of the pattern authorized in the related construction permit **BPED-20070801CWG**. The vertical component **RMS** value is **0.649**. The horizontal component **RMS** value is **0.649**. The circular polarized component **RMS** value is **0.685**.

Azimuth and elevation plots and associated tabulations of this antenna are included with this package.

Measured vertical polarized directivity:	2.376 / 3.758 dB
Measured horizontal polarized directivity:	2.372 / 3.751 dB
Measured circular polarized pattern directivity:	2.134 / 3.292 dB

Gain in each polarization was calculated using the following relation:

$$\text{GAIN} = \text{Azimuth Directivity} \times \text{Elevation Directivity} \times \text{Power Ratio Between Polarizations}$$

Using this relationship along with ratio measured at our testing facilities:

$$\begin{aligned}\text{V-Pol. Gain} &= (2.376)(.4996)(4.088) &= \mathbf{4.852 / 6.859 \text{ dB}} \\ \text{H-Pol. Gain} &= (2.372)(.5004)(4.088) &= \mathbf{4.852 / 6.859 \text{ dB}}\end{aligned}$$

INSTALLATION AND MOUNTING

The antenna is to be mounted in accordance with the supplied drawings. The antenna center of radiation is to be **113 meters** (370.75 ft.) above ground level. The antenna aperture is **32.39 feet**. No other antennas are to be mounted within **10 feet** of the antenna. No other obstructions other than those specified by original drawings supplied are to be mounted at the same level as the antenna.

The system's orientation and the mounting details are described in the following drawings:

DRAWING NO.	TITLE
12301D0	ANTENNA ELEVATION
12301D1	ANTENNA ORIENTATION
12301D2-4	PANEL ASSEMBLY DETAILS
12301D5-9	ANTENNA AND PIPE MOUNTING DETAILS
12301D10-11	FEED SYSTEM SCHEMATIC AND LAYOUT
2105A10	TEST RANGE SCHEMATIC

The array shall be mounted according to **DWG. 12301D0**. The antenna elements shall be aligned at the same heading as in **DWG. 12301D1**. The panel mounting detail assembly is shown in **DWG. 12301D2** through **DWG. 12301D4**. All mounting brackets shall be mounted as in **DWG. 12301D5** through **DWG. 12301D9**. All of the feed system shall be mounted in accordance with **DWG. 12301D10** and **DWG. 12301D11** to ensure the azimuth pattern is radiating properly.

DOCUMENT EXHIBITS

The following exhibits are included as part of this Certificate of Compliance:

Exhibit 1	Circular Polarized Azimuth Pattern Field Strength Tabulations (Composite)
Exhibit 2	Measured Horizontal Polarized Azimuth Pattern Measured Field Strength Tabulations (Horizontal)
Exhibit 3	Measured Vertical Polarized Azimuth Pattern Measured Field Strength Tabulations (Vertical)
Exhibit 4	Elevation Pattern Elevation Tabulations
Exhibit 5	Antenna Data Sheet
Exhibit 6	RMS Calculations
Exhibit 7	Drawings

TEST EQUIPMENT

Network Analyzer	:	Hewlett Packard Model # 8753C Serial Number: 08753 – 69138 Calibrated 4/28/09, SWR, Inc.
Computer	:	Pentium 3, 450 MHz, Range Program
Printer	:	Hewlett-Packard Laser Jet 6L
Positioner	:	Orbit Positioner Calibrated 1/12/10, SWR, Inc.

Surveyor's Declaration

I, _____, subject to the penalties of perjury, do declare the following:

- 1.) I am a licensed surveyor in the state(s) of _____,
_____, and _____.
- 2.) I have provided professional services to _____
(permittee name), permittee of WYFG -FM, Gaffney (city of license), SC
(state), during the installation of the WYFG -FM directional antenna.
- 3.) I certify that the WYFG -FM directional antenna has been oriented at the
proper azimuths as authorized in the construction permit (FCC File
Number BPED-20070801CWG).

Sign_____

Dated: _____ mm/dd/yy

Engineer's Declaration

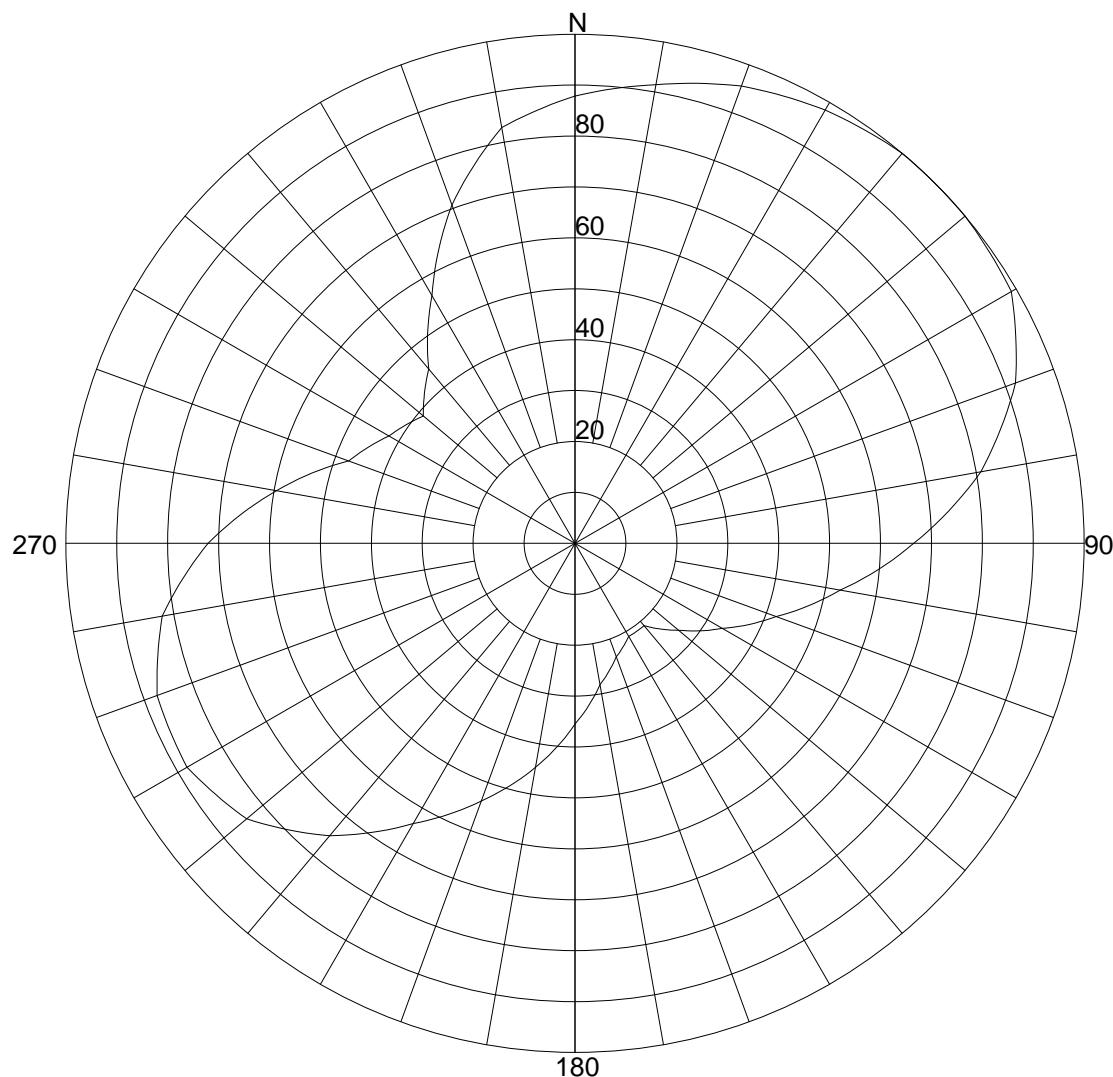

I, _____, subject to the penalties of perjury, do declare the following:

- 1.) I am the holder of a valid General Radio Telephone Operators License, Number _____ (FCC License No.)
- 2.) I have been a member of the Society of Broadcast Engineer's since _____ (year)
- 3.) That I have been employed as a technical consultant with the firm of:
_____(firm name), of
_____(city state)
- 4.) That _____ (Firm's Name) was retained by
_____ (Permittee's Name) for the purpose of preparing its application for the construction permit of WYFG -FM Gaffney (City), South Carolina (State), from which the underlying Construction Permit (FCC File Number BPED-20070801CWG) was granted by the Commission.
- 5.) That I am familiar with the terms and conditions of the WYFG -FM Construction Permit.
- 6.) I hereby certify that I have overseen the installation of the WYFG -FM directional antenna and that the installation was complete to the manufacturer's instructions.
