WWEL (FM) RADIO STATION  
CH 280A - 103.9 MHZ - 2.55 KW  
LONDON, KENTUCKY  
February 2002**

**EXHIBIT A**

**Compliance with Section 73.213(c)**

The proposed antenna location for WWEL does not meet the Commission's minimum distance separation requirements, §73.207, with regard to stations WDEB-FM, Channel 280A, Jamestown, Tennessee, and WXXQ-FM, Channel 280A, Whitesburg, Kentucky. All three Class A stations (WWEL, WDEB-FM, WXXQ-FM) commenced operation prior to October 29, 1989, the date on which the maximum effective radiated power of Class A stations was increased to 6.0 kilowatts. All three stations are operating with the equivalent of 3.0 kilowatts at 100 meters HAAT (or less). As such, the spacing to WDEB-FM and WXXQ-FM is based on §73.213(c)(1) of the rules. As detailed on Exhibit A1, Channel 280A, at the present licensed site for WWEL, complies with §73.213(c)(1) toward WDEB-FM and WXXQ-FM, and complies with §73.207 to all remaining facilities.

This application proposes to correct the coordinates of WWEL and increase the height of the tower. As shown on Exhibit A2, Channel 280A, at the proposed WWEL site, remains in compliance with §73.213(c)(1) with respect to WDEB-FM and WXXQ-FM, and with §73.207 toward all other facilities. Therefore, this proposal is in compliance with the Commission's rules with respect to the separation requirements to other FM facilities.
